Thread: [Jacking Inactive IG Accounts](#)

Wubix - March 26, 2018, 10:46 pm

Hey, anyone experienced in this? I would love to learn, obviously I would give you something in return if you could teach me ?

I found an account I want that hasn't posted in 5 months, is this possible? If so how, if not how long the time period before it's possible and If you don't want to share your method public, feel free to Post below and I'll PM you

Mr Meeseeks - March 26, 2018, 10:49 pm

If you would like to look into this, try starting with brute force attacks.

I figured this would be the first method i'd see, the problem is GEO lock. If I was too bruteforce the account i'm sure I would get hit with GEO lock and it would have been a waste of time without verifying access

You should start by posting in the correct subforum

Either <https://hackforums.net/forumdisplay.php?fid=48> or <https://hackforums.net/forumdisplay.php?fid=48> would work. However I doubt your request would actually be fulfilled on HackForums or anyone would take the time to do such even if you pay. Your best bet would be to learn how to do this yourself.

Ah I see, well in honesty, I'm hoping to learn so I know but I have no idea how I would bypass geoblock unless I knew the location the IG was created in then I could switch on a VPN, but other than that I want to know if anyone knows how to jack inactive IG's, would help me out hugely, I only want to do this for one account ?
