Thread: [Automated Paid Stickies](#)

**Omniscient** - March 27, 2018, 2:33 pm

Well it's done and ready to be tested.

<https://hackforums.net/buysticky.php>

Current default pricing is \$20 or \$75 per month for all sections which are not custom pricing. Each section is max 6 stickies.

The custom pricing currently is as follows:

PSS \$60 per week

MT \$40 per week

Lounge \$30 per week

CED \$30 per week

CEM \$25 per week

CSI \$30 per week

Huge introductory special to help us kick this off and to show you how easy it is to now buy an HF sticky!

\$5 per week in all Personal Life sub-forums:

[Personal Life](#)

There is a max of 3 stickies only for each of these section so act quickly.

Please note this is a very complex plugin. I will try to explain in the best detail how the plugin works but I first want to see members trying to use it and if it's intuitive enough on its own.

Enjoy and thanks.

EDIT: Oh snap! I forgot to profusely tell Xerotic how excellent this plugin is and how great of a job he did. I personally could not have coded this any better. It's exactly to my specifications and standards.

**Boolean type** - March 27, 2018, 2:35 pm

Been waiting for this so long. THANK YOU BOSS

(Mar 27, 2018 02:33 PM)Omniscient Wrote: [\[CITE\]](#) There is a max of 3 stickies only for each section so act quickly.

So now max 3 sticky threads in each section, not 8 ?

**Biggy** - March 27, 2018, 2:35 pm

All these amazing updates.. can't even handle.

Amazing work Omni and Xeotic. This is a huge step up for an automated process and will allow for more work to be done elsewhere.

? **Soufian ?** - March 27, 2018, 2:35 pm

Great to see this being added!

I bet it was a pain in the ass for all these years to handle all of this manually lol

**Xerotic** - March 27, 2018, 2:36 pm

Great to see this finally active. Enjoy everybody :)

**Saltpeter** - March 27, 2018, 2:38 pm

Great work you two. Keep the good stuff coming :)

**Bluffer** - March 27, 2018, 2:39 pm

Holy crud that's a good sticky deal, ima jump on that.

**Crystallize.** - March 27, 2018, 2:42 pm

I discovered this while reading a stickied thread, thought I am the first to find it. :(

Great job both of you especially Xerotic for making it happen!

**Cameron** - March 27, 2018, 2:42 pm

Awesome stuff! Well done Omni and Xerotic! One issue I noticed is that there's the option to purchase a sticky in Marketplace Discussions and Deal Disputes which you don't allow. Apart from that it looks great!

UPDATE: Marketplace Discussions comes up with "This forum is not allowed to have paid stickies." but you can still purchase one in Deal Disputes.

**Views** - March 27, 2018, 2:43 pm

Glad to see this feature active it's gonna be a amazing feature for HF as you won't have to spend a lot of time on stickies anymore.

I'll use it next time I need a sticky thread.

**Deany** - March 27, 2018, 2:43 pm

I was just about to say, "Riyu go test it out"

**Charger** - March 27, 2018, 2:44 pm

Default is 6 unless otherwise specified. You can see if any threads are queued up before you purchase it though.

Everyone has a chance now. You cannot purchase a sticky for a thread until its current order is completed.

(Mar 27, 2018 02:54 PM)Payload Wrote: [\[CITE\]](#) Are we able to stick the same thread in multiple sections with the plugin?

A single TID can only be in one location. You will not be able to create duplicate orders.

Thought about that but then some people could hold a spot forever.

Default is 6. Some sections are different.

**Omniscient** - March 27, 2018, 3:14 pm

Quote:The only sad part about this is I'll no longer ever have a reason to PM omni :(

I'll have to find new ways to interact with the community.

Quote:finally, I can cop premium sellers section spot easily.

The section is currently sold out. However, you should be able to queue a thread. One serious innovation for this plugin is that we allow you to buy a sticky in a section will get placed once an existing thread is removed. A task is run which checks for expired stickies and removes them. It will then see if any threads are paid and queued and will then stick it. So no more waiting around for a sticky to open up before you pay. You can essentially prepay and reserve a sticky slot.

Quote:Are we able to stick the same thread in multiple sections with the plugin?  
No.

Quote:yes but maybe this should be removed  
But members might. For now that's the default text for all paid stickies. I will likely make alterations to it as we go forward.

Quote:would be nice if there was a Tab here  
Done, added to extras.

**Riot** - March 27, 2018, 3:20 pm

Great job Xerotic. This has made me want to buy a really dumb sticky but I'm going to save my money instead I think. ?

**IceyP** - March 27, 2018, 3:25 pm

So for example my sticky ends april 14th. You said there is a que system? So if i want to buy a month worth and i pay on april 13th will it just add a month to mine?

**Elitas** - March 27, 2018, 3:56 pm

So what happens when a thread is queued? If there is already a forum with a queue then let me know so I can see it for myself.

Would it show the threads in the listing or just a thread number?

**Xerotic** - March 27, 2018, 4:15 pm

(Mar 27, 2018 03:56 PM)Elitas Wrote: [\[CITE\]](#) So what happens when a thread is queued? If there is already a forum with a queue then let me know so I can see it for myself.

If there is a thread in the queue it will let you know before you confirm your order. However currently there is a bug where if there is no queue but the section is otherwise full it will tell you there is no queue, which is true. But your thread will be queued instead of stuck right away. This will be fixed in an update soon. ?

For now that issue is purely visual and will NOT affect the actual function of the system.

Unfortunately the nature of cryptos and CoinPayments slows down the payment process. It takes a few minutes for CoinPayments to approve a payment and tell HF's system that it is completed.

4 weeks = 28 days @ \$20 (default) per week = \$80 for 28 days

1 month = 30 days @ \$75 (default) per month = \$75 for 30 days

Probably going to adjust that page so it only shows "4 weeks" and just applies the month duration and rate automatically. Not sure yet what will work best.

If you extend a sticky then what happens to the queue? If there isn't a queue then you can wait for it to expire and extend it. Which is what we did before. So realistically there isn't much of a policy change when it comes to extending a sticky.

The system is automated now so it should be much easier to renew a sticky without having to wait for me to reply to a PM. I also suggest you buy max time to avoid constantly having to renew. If once a month you have to renew I think that's reasonable.

Quote:Something tells me this can be abused in a way

If you have something in mind we missed please LMK. And even with tamper data there are safeguards in the IPN after the payment is made.

Quote:IF someone wants to waste their funds and sticky a bunch of garbage im sure omni's wallet wont mind.

Pretty much. Most of the ways this could be abused would just be wasted payments which would either be handled by the system automatically or manually with the tools we have in ACP to manage paid stickies.

Quote:You should add a bidding system somehow

I have honestly considered it. But for now, I think we'll run the system as it is. It more or less reflects an automation of how it was before except for the queue system which was required to compensate for blockchain payment confirmations.

Quote:Cough [NBA] LeBron James isn't the Best NBA Player. Cough [NBA] LeBron James is the Best NBA Player..

Not necessarily true. We are aware of abuse potential but have opted to leave them be until we see if they will actually be abused.

This is Sticky Bot. He does PM members with information regarding the order automatically. Now that we have the banner on paid stickies we no longer need to have a post on the thread. Maybe the expiration time could be added at top though.

good job but i think gathering the money manually has its own pleasure sometimes :D  
edit: i see it writes in green on the thread that is paid sticky, you should add the date too like this is a paid sticky until..... so we can check easier when it expires

I have that as an update written already for when Omni next updates the plugin when he is online. ?

I'm laughing at the "if you or a loved one would like to buy a sticky" part ?

Glad to see a post implemented now though.

Yup the plugin has been working pretty well so far. We've made some adjustments based on feedback but now I think it is time to switch focus to developing new projects. ?

**Blazin** - March 30, 2018, 1:36 am

Just purchased a month of webhosting sticky. Will see if all goes well, I used the link you provided.

**2073436** - March 30, 2018, 2:21 am

too bad can't purchase the \$5 with BTC bcs the payment processor limit is 0.001

Don't forget to sync it with paidstickies.php if it hasn't already been done.  
Obv that and [Help Docs](#) is not priority though.

That page will probably slowly die out. It was Staff only access anyway. Mentors are probably able to see it too I think.

There is much better data now in ACP for Paid Stickies.

I need that legacy page for a week or two more. It's helped us find at least one bug which we fixed. It helps me see that existing threads are indeed expiring correctly.

We may end up using paidstickies.php url and rebuild the page to reflect the new system.

But for now it stays as-is.

FYI Bandors figured it out. No error on the plugins part.

We have been developing and altering the plugin to suit our needs and fix things to make the plugin as idiot-proof as possible.

Some things changed are:

1. You can now buy a sticky to be queued even if the thread is already stuck. This allows you to essentially extend a sticky. Let's say you rebuy the sticky and you're next in queue then when your sticky expires the plugin will stick it again. This will give you the ability to make that payment to add more time anytime. However your thread can only be in queue once so you can't do this infinitely. Example is you buy 4 weeks in PSS. There is none in queue, you could put your thread in queue again for another 4 weeks. This basically sets you up for 8 weeks. Once the original buy expires and the queued sticky goes into effect you can add 4 more weeks in queue. Do that perpetually and you're extending it forever. But that's based on your thread being first in queue. If you're third in line then there could be lapse days unstuck but that's only fair and that's how the system was before. Now it's all automated.

2. We added a PM when you create the PS invoice. Let's say you create the invoice but don't go to CP to initiate the payment. Before if you closed the page you could not continue the order and we have it set to expire in X hours. It wouldn't let you try again since you had an open order invoice unpaid. Now the system will send you a PM when you create the invoice. The PM will include a link that allows you to restart the payment on HF so you don't have to wait for the unpaid invoice to expire.

I think that's enough explaining for now. There will be better documentation written up once we are 100% done with alterations.

Seems good! Now that people can extend stickies, there won't actually be any big changes in stickying your threads than there was, other than the fact that it's automated. ?

Really happy with the devs on this stuff A++. I remember sometimes you would need to wait a day to a few days for a reply for a sticky. This will surely help omni's workflow out and automate the site so much better for him and all the people using it. Thank you.

Yes, I will be taking care of that.

**Otis????????????????** - April 2, 2018, 5:33 pm

I was buying a one week paid sticky in a personal section for \$5 and planned on paying via BTC. When I went to pay for the sticky I was prompted with the following error.

Spoiler [\(Click to View\)](#)

There should be some type of warning of the minimal amount before placing the order.

Another issue is that there is no way I can cancel an order. I was just going to cancel it and do two weeks to meet the minimal amount required to pay via BTC but there is no option to cancel. The only thing I can do is wait four hours and then re-do the order.

Just my two-cents, other than that, I'm loving the plugin.

Yeah, I gotta add that. But I might also just make it so that it's a higher fee for the sections. The \$5 was to help kick-start the sticky testing.

**Omniscient** - April 2, 2018, 8:56 pm

Introductory price of \$5 for Personal Life stickies is done with. They are now \$10 each per week.

Also it's time to unstick this thread.
