I like the passwordless crunchyroll the most!

What's your favorite out of these that you made?

I like Chef Gain's the most from these four. But there are also new thread designs I have made today which looks cooler for my opinion. But they are being used in other forums so I won't post them here.

I just started graphic designing a couple of days ago. ?

Pretty nice that you were able to pick this up pretty quickly. I don't have much of an eye for design; it's probably all in my head

At first, I didn't even know how to add those rectangles or change the colors of some icons I found online.. Before I was like searching google with, "envelop icon orange color", but I have learned along the way.. I wouldn't be able to learn these without the internet, salute to the net ?
