This is for the people that has never watched a anime but want to try it out. I'll try my best to find a anime that you have interest in.

How do I find a anime where you might be interested in? Just post here your movie/serie preferences (that isn't anime) and maybe favorite genre. For example:

Code I'm into a lot of action and series like The Punisher a little bit of romance is okay.
Feel free to give more information as that is just example.
I hope I can get more people to show interest in anime like this.

I don't watch much Anime but even Anime haters would love SAO and AOT.

Sword Art Online I fell in love with.. it's amazing!

Try Log Horizon

You should warn them about the strict "gamer format and language" that comes with Log Horizon which has led many to drop it due to boredom. Could always recommend .hack series or mainstream stuff such as Overlord and No Game No Life ;)

Also Japanese is just the Gunpla Lord >:}
