do you have any good torrent site to upload my adware without get banned?

neroazzurro - May 20, 2018, 6:29 am

Nop, but I ask if I can make revshare with owners and pay them for each install

pm my i have seedbox
but i new use need some one learn my

apt-get - May 20, 2018, 7:34 am

its best to do this method of spreading with game iso's and cracked programs. you bind a downloader to the iso, since then you can just re-crypt your file when it gets detected. there are many torrent sites you can use however KickassTorrents is a good start, however you must apply and tell them exactly what you want to upload.

KAT will always live on in our hearts and on other servers. katcr.co is a neat mirror.

I didn't know there was such a nice mirror around, even with the community section is still intact.
Thanks for pointing that out to me.
