plz help regarding this!!Not working anymore ever since WhatsApp encrypts everything. Sorry. Maybe you should try downloading encrypted chats from /sdcard/WhatsApp/Databases and try decrypting those .crypt12 files.

Take a look

Whether I, or anybody around here uses cracked software, it is NONE of your mother FUCKING business. Let it be. Thank you. OP asked a simple fucking question about Droidjack itself... Cracked or not, you don't give a fuck. It is ON-TOPIC and it is A RAT.

-rep me all you want, won't give a shit. This flaming needs to stop.

How to solve this problem in droidjack

Oops! Something went wrong! Sorry!

Noshy - June 29, 2018, 3:27 am

cracked droidjack?? lol just go use spynote. its better,stable,faster more features+fun and easy to use.

we will be happy to answer questions for spynote. ;)

i am sure their would be absolutly no problem with the discussion about droidjack because it is, like Quicksilver said, an on topic question. And i also think that the rule is more aplied about the discussion of the cracking process itself, but the rule does describe the general discussion about cracked software only. Therefore and because v4_vikrant has directly mentioned that he is using the cracked version of droidjack he has now maybe broken the rule. And everyone assisting this discussion could be penalized to. But it is all about the the point of view of the moderator which may read this thread. But like someone said before "what would it bring to decry something without giving an alternative". I suggest you, v4_vikrant, for the future to dont post that you want to discuss the functionality or whatever of cracked software or you may will be punished for it or if you want to then dont metion it.
