Gotta admit its been a while since I used one of these so I actually had to get a combo list to test it. It loaded a TON of stuff to test, and has gotten through about 3/4 so far, no issues, no software crashes.

Software seems very stable and functional.

Few points I made to OP about the software. The only thing that really stood out to me, was the fact the softwares interface design seems somewhat basic, or older based type software. However putting aside aesthetics. Software is functional, and stable.

If I was in to account cracking I would certainly consider purchasing this product.

Highly recommend ?
