Thread: [Starting A HypeBeast Clothing Line](#)

RichCrispy - April 2, 2018, 10:02 am

Hey, I've experienced with making a clothing line using Shopify POD. But the only problem was it didn't give me the freedom to create actual good looking clothes. I want to be able to create clothes without restrictions (Like printing areas, colors etc). I'm looking for a partner that can someone help me with this journey.

I'm looking for a partner that...

Can support this project financially (We split costs 50/50)

Some sort of connections with manufactures, designers etc

Some sort of Hypebeast and clothing line knowledge

Lastly, a supportive and active

Any marketing, advertising, graphic designs will be helpful

I'm only looking for those who will stick with me during the project and ones that will not abandon me. PM or post if you would like to partner up.

I am still looking for this

I might be interested but the bit where you say "can support project financially" will it be ok if i can support the project once it starts making money or is it 100% a requirement to have investment money beforehand?

Hey man, have quite a bit of knowledge. I am a student studying fashion design, interested in hearing what your plans are. Shoot me a PM.

Where are you from?

Depending from that we can see if we can do something or nah.
