Thread: [Like actually come join us on XMPP - HF live chat. // Avoid HF downtime and keep up.](#)

Mr. Robot - April 3, 2018, 5:31 am

Yall need to up your game and it seems most of you still aren't using the XMPP room. I'm going to make this really easy so you have 0 excuses. I can write how to run it through proxychains if you really want me to using tor as default. No point though.

(taken from Omnis thread: Some common features in the Hacker.IM service are file transfers, group chats, OTR, and more.)

Add users from the chat/HF and speak to them securely. Start using XMPP today.

1. Go here:

<https://hacker.im/register>

2. Download Pidgin

<https://pidgin.im/>

3. Open Pidgin

4. Choose the protocol XMPP

4a. Enter Username which is just the first part.

4b. Under Domain enter hacker.im

4c. Enter your password.

5. Click Tools > Room List

6. Get List - if you get prompted for "Enter a conference server" enter im.hacker.im

7. Click the room 'hackforums' that pops up then click Join.

Voila see you in there.

I'm too scared to talk to people, why in the hell would I do this?

Why not. You don't have to talk, but it's a good platform for communicating with Omni and other members.

You know there's a reason why I disabled my PMs, I don't want to be contacted privately. So personally I see no reason to contact someone off site or omni.

That's your choice. I'm watching to see how many users join and one just did - The user free707. Welcome to the chat buddy.

Is it possible to voice chat?

JAS - April 3, 2018, 5:40 am

I dont know why so little people have joined, come on.

It is definitely possible to voice chat using pidgin as well as video chat. You will have to do it outside this group but you can add users and do that if you wish.

(see voice/video under plugins)

I just figured people mustn't know how to set it up or something. I hope it's easy enough to follow. If anyone sets it up from scratch and theirs is different, please let me know.

Gilbo - April 3, 2018, 6:46 am

Great guide, easy to follow.

Took literally 2 minutes.

Tree of Life - April 3, 2018, 7:22 am

Thanks for the simple as fuck tutorial. I tried a different tutorial some time last year but I still couldn't figure it out then I gave up.

I've done everything but "Room List" is not available for me, do you know what might cause this?<https://hackforums.n>

I already had an account and were on the server but can't join any rooms.

Did you follow the tutorial exactly? If you already had pidgin - uninstall it and install it again.

What were you doing differently than the OP?

You can join with other accounts, but if you follow it exactly as I have stated - even making a new account (as pidgin can hold multiple) it should work just fine.

Just had to reinstall Pidgin and it worked. I just had to update it or something since It's been a while since I visited the im. Thanks though.

I'd be more spooked they'd brick my computer.

The elite can stick to their sticky corner in the xmpp. Be a real man and play with no encryption ?

I have my CPU encrypted, even if the FBI raids me I'd like to see them try to decrypt my GPU. Still scared of joining the real hacker squad though, I bet they even encrypt their PSU.
