Thread: [HF broken on iPhone X?](#)

Crystallize. - April 5, 2018, 9:59 am

I don't know what happened but since the morning I cannot browse HF in phone, tabs are unaccessible, most of the images doesn't load and most of the things are unclickable.
Any ideas?

<http://knotbb.com/>

Is it the same on KnotBB or just HF?
Test

Motusora - April 5, 2018, 10:01 am

it looks fine using my android phone, maybe its just you

Yep tabs are not working there either.
Also alerts doesn't get updated to green either.I think something is not loading right.

Sounds like you're having JS and CSS problems. Nothing was changed on our end that may have caused that.

Can you direct access these pages:

<https://hackforums.net/cache/themes/theme10/global.css>
<https://hackforums.net/jscripts/general.js?ver=1814>
<https://hackforums.net/jscripts/jquery.js?ver=1814>

And you can try to go into the XMPP chat room and see if someone can help you solve this.

Seems to be working now, thanks!
