Thread: [Watchdogs AC still inefficient](#)

keplar - April 7, 2018, 12:15 pm

i believe the same flight and speed methods have been used for watchdogs for like 6-8 months, still haven't been patched what-so-ever.

I understand it bans players in waves, but its honestly pointless since most people have dozens of accounts.

Cause watchdog is fucking ass man

HorribleCoder - April 8, 2018, 9:32 am

their speed check is from latest ncp with it slightly dumbed down allowing you to go like 0.1 faster on hypixel than you can on other servers running ncp. 90% of their anticheat is dumbed-down ncp.

(anything that flags you but doesnt ban is from ncp)

afaik the only good check they have is their noslowdown check for swords (they only check swords bc autoblock) but thats an easy bypass too

if your client bypasses ncp you can be 100% sure it will bypass watchdog as long as you dont hit the bots / your noslow with swords doesnt get detected

Twixles - April 8, 2018, 12:37 pm

In my opinion it has gone from horrible to just bad. They have some decent checks, but they're working incredibly slow.
