Thread: [Valve generated steam account + Uplay account + Blizz Account + Origin Account](#)

bluerocker - April 8, 2018, 10:29 am

I'm selling a special steam account with 250 games. This account was created using a Friends and Family code that was given to me by a senior developer at Valve back in 2010. What this means is that all future Valve created games will be automatically pre-loaded onto this account for free for the lifetime of Steam. The account is worth according to SteamDB.info \$696 - \$2497 All publishers on the Steam platform can generate keys to give their employees access for free to all of their respective games. Valve has a master key which is given to every single Valve employee and that gives them access to every single game on Steam. Just a little background on how these keys work, mine is of course not a master key. The only way to get one is for a senior developer to generate one, however that sets off an alarm whenever one is generated and so you would never be able to be given one by a dev (believe me i've tried hah)

PM me for a link to the SteamDB link that shows my account and the games it has.

**** I will also be including with this sale my Origin account which has, Battlefield 1, Battlefield 3, Battlefield 4, Burnout Paradise Ultimate Box, Crysis 2, Dead Space, Dead Space 3, Medal Of Honor, Medal Of Honor Pacific Assault, Mirrors Edge, Peggle, Sims 3,

Also including my Uplay account which has Watch Dogs 2, For Honor, and Trials Evolution Gold Edition

Also including my Blizzard account which has Starcraft 2 : Legacy Of The Void and Overwatch

I will accept payment Paypal/Bitcoin. Using a trusted independent escrow (here on HF) that we mutually agree upon for this transaction to protect the both of us.

I also will consider EVE Online characters and/or large skill injectors/isk as a trade for all of these accounts.

I cannot post links in this section of the forum but this is from SteamDB

Account Value

lowest prices \$686 — \$2378 today's prices
