Thread: [Free Email - coke.cx](#)

Ludicolo - April 8, 2018, 8:33 pm

Hello,

Giving away free emails and no its not through cpanel/plesk. We are using roundcube but it's through a poste.io mail server.

Before sending emails, I would recommend going into settings and turning on encryption, you can also use PGP encryption on top.

Pick any Username@coke.cx and I'll send you a randomly generated password.

By May 1st we will be moving to a custom solution. Once we move to a custom solution we will have 5-7 domains available for picking and the ability to add your own domain.

Features:

ClamAV

SpamAssasin

TLS Everywhere

All passwords are by default stored as salted SHA512 hash.

MYSTERY - April 8, 2018, 8:48 pm

Hey can i a copy of this? :D
