Thread: [How to send out a mass email for free?](#)

Shoelaces - April 10, 2018, 3:12 pm

I have a list of about 1200 people I need to email but how do I email them all at once? Do I just copy paste all the emails into the bcc? Or what? Thanks!

Zexi - April 10, 2018, 3:14 pm

I dont think there is a free option to email that many people at once.

Gmass is a sick free one but they limit you to 500 emails a day and if you dont have a Gsuite account Gmail limits you to 50 emails per day.

And wrong section i guess btw

There are cracked options too but I wouldn't recommend them however they are free and in some cases, that's all that matters.

So can I just take like 100 emails put them in the bcc and be good?

ino this person who pulled this off very well and he sent over 2700 emails to different schools in the united kingdom and cost next to nothing, i think what he did was very stupid but i just wanted to say i was there he set it up and did it in no time at all like 1hr and it was done, he was arrested by the nca days later tho hahaha.
