Just wanted to drop in and vouch for eEelad. Purchased the silent miner yesterday and it was delivered fast. eEelad also has been a huge help over skype. I had plenty of mining noob questions and he also took the time to make sure it was up and running.

Definitely worth purchasing! You get more than what you pay for! great deal!

So before few days i purchased this miner from this guy.We talked on skype and i asked for a crypted miner.After few minutes he sent me the miner.The miner was not FUD and also i was getting an error when i was trying to start it .I asked him whats going on . He told me i don't know its working fine for me maybe is your computer. I tried it on 4 different computers and i was getting the same error over and over again. I asked him for help or to give me another file .He told that this is working fine on his computer and that he can't do anything.Since then i am trying to communicate with this guy and he is not respoding on any of my messages.I just need a working miner or a refund if you can't make one and also what kind of seller is asking his customer to give him 9\$ because its his friends birthday ?? ahahahah

Anyway 16 \$ for nothing.Miner its not working at least for me , i don't know about you guys.Good luck with your sales bro.You have to be more proffesional .Have a nice day !
