I have been e-whoring, but i was a member of another fourm at the time, and found this one trying to setup a botnet. This fourm is much much better than the other one i was on, no need to name it as that would be advertising.

i have mad eabout \$500 in the past not alot but for doing almost nothing it was very good.

I would just like too see some of the new methods that people use as it is getting harder and harder.
