Thread: [Cryptocurrency wallet where you can buy bitcoin and other cryptocurrency instantly!](#)

Boyka123 - April 12, 2018, 12:00 pm

I am sure that many of you heard for IQ Option platform for trading (Binary Option,Digital Option,Forex,CFD,Crxpto trading) and This broker is full regulated with CYSEC,and now they have their multi cryptocurrency wallet where you can buy all major criptocurrency instantly and hold it,or send/recieve,sell,Withdraw etc... If you have IQ Option account you can login in hodly wallet with your email and pasword which you use for IQ Option account.

Hodly- ht tps://ho dly.co m/ (copy this link without space to your browser and press enter)

Verification on Hodly is for about 15 minutes (for me verification was instantly) you only need upload your ID card and you will get all features of Hodly!

Hodly wallet supported OTN tokens and other cryptocurrencies - BTC, ETH, XRP, BCH, LTC, ETC, BTG, ZEC, OMG, NEO.

NOTE: You can send and withdraw only BTC, ETH and OTN tokens other cryptocurrency you can buy and hold on hodly wallet or sell,or exchange for dolars or bitcoin and withdraw it (send and withdraw is not available yet for other cryptocurrency)

Deposit metods are:Visa/Mastercard,Skrill,Neteller,Webmoney

There is no commission on deposits. Minimum deposit is only \$10

Commission fee for buy cryptocurrency is about 4,5%

Commissions on withdrawals are= 0.001 BTC, ETH = 0.0007, OTN = 0 ,other cryptocurrency you can buy and hold on hodly wallet,or recieve,or sell it for dolars or exchange for bitcoin and withdraw it

For me this wallet is great because it in relationship with IQ Option-and they are full regulated with CYSEC

I hope that I can help somebody who have problem on other exchangers like Bittrex,Bitstamp etc...
?
