LOVREN'S APPLICATION TO SUPERIOR

What topics are you interested in (SKILLS)? Finding Exploits and Unsaturated Methods.

Give a brief description of what you can bring to the group: I am always on, if i'm not I am probably working or sleeping. If I joined the group, i;d be willing to give away new exploits and method I find out free of charge and would inform the group members before releasing to the public. I love investing backdoors to websites and see what I can find in hoping to make it a better place. I am willing to contribute to any giveaways or chats the group may have. I will help any members with all my willing and will try my best to give the group a good name by hosting some giveaways here and there and some fun things in the sub-forum. As a whole group, I could collaborate with a lot of talented people and can come up with something good and big and then could be sold for a good amount of money or even given away. I am ready to get closer to some people and meet people who have different talent other than myself. I can build amazing chemistry with other people so I am easy to get along with. Last thing I am trying to do is bring in drama with anybody. I'm a very humble character and love to help people when they're struggling. Kindness is all I have and all I can give.

Activity-wise, how active would you be on the site on a scale of 1-10? Recently, I would rate myself at a 9. I only just became active on here again.

How much do you engage with the community? I definitely engage with the community a lot and I am very proud of it. When someone needs my help I am always ready to give them the help they need no matter the situation. I have knowledge about the market and the community and have mutual feelings with a lot of members on here.

We want active and high quality members representing our group, so link a contribution you're proud of: Like said above, I am ready to give anyone the help they need, here's a free of charge service I run on here: <https://hackforums.net/showthread.php?tid=5827307> I have helped around 3 individuals with this service on here.

Anything else we should know? Yes, here's a little about me. This could be relevant for you. I am currently living in the United Kingdom. I'm an inspired writer that is hoping for the best in the future for myself. I have passion about writing and music and I pretty much enjoy to lounge around. I am an helpful person and like to meet new people across the world. I am a HF user and I use it day-to-day and have been for the past month. I have been on here for a year and that's helped me develop my skills in the market and meet new people. I recently just became active on there again because I just finished a big project I had been working on for two years. I believe I signed up on here to get some Graphics for a project I was making. I have a passion to grow my alias in the scene in the next few years and become a High tier member that other members look up to. I am good at writing hence why I am the Hack Forums Monthly Writer about Music. I can help a lot of people with anything exploit related or writing. I could possibly help people develop their English skills if English isn't their first language. English isn't my main language and I've had to learn it from when I was growing up so me having past experience of learning English successfully could motivate somebody else to do so. I look at myself as an intelligent and down to earth individual that is willing to help others for their problems before I resolve mine. I'm one who exhibits a kind nature and very detailed. I'm observant and spot peoples' and situations' needs very quickly. As an example, I tend to notice when one is down and I am always ready to pick them back up. I am also inclined to point out missing links and blind spots when working on projects. I like to think through issues carefully and weigh how such decisions will affect people. This behaviour stems from my ability to accurately and objectively perceive another person's feelings without necessarily agreeing with them. It's a useful strength I use when interacting with people to obtain people's feedback and to help them with their problems. Writing is one of my biggest accomplishments. I would do anything to become a big writer. When I write it let's my feelings out when i'm not able to talk about them.

Writing on a piece of paper is always fun and always helps me to release some stress. I also like to think of stories to write about. The greatest feeling is sitting somewhere and you see something interesting that you can write about. I have been a writer since I was younger and always have had passion for it and would love to go further with it. But an accomplishment I have is earning some awards and trophies for my writing. Also when I was in school I attended the UK Radio 2 500 Word piece and became 7th out of 240,000 students across the country. That was an amazing accomplishment for me and will always remember how far I got in it. When I was younger, a few years ago I had a School Band which did some RnB Punk Music, I've moved onto EDM and Hip Hop lately because that's the genre everyone listens to in this current generation. That's a brief description of myself and who I am. Hope you learn my intentions and my character.

Even if I don't get accepted, thanks for reading my application and goodluck with your amazing group.

Let me know if i've been declined or accepted, thank you!

- Lovren.
