Hello fellas it's ye boy Aggron again. and today I'm selling my OpticsPlanet.com cracker (written in PHP)

Ever bought a AR15 before and woke up the next day not being able to aim for shit wishing you had a sick ass scope? Fear no more with the DANK products I deliver. Get optics for CHEAP or FREE with my voucher cracker.

site: <https://www.opticsplanet.com/>

Here are some features:

1. Proxyless. Can send upto a million requests a hour!
2. Sourcecode, by buying you'll recieve the sourcecode for FREE so you can analyze it and try making your own cracker!
3. 100% unlimited support, feel free to message me anytime!
4. runs 24/7 and is multi-platform as it is a PHP code!
5. Not too hard to setup on Unix enviroments, basically run n go.
6. Auto saves all valid optic codes
7. No need to import a code list it'll generate them for you
8. No false positives it only gives you the correct codes

Proof and example: <https://i.gyazo.com/c7f654e71443b7e95c139bf7644c0218.mp4>

Buy it here: <https://digitox.net/p/vg6rc>

We accept: Crypto or PayPal

By purchasing this product you acknowledge that getting codes isn't guaranteed, it's a bruteforcer, not a magic machine. It'll attempt random possible optic codes and check if they work or not.
