It looks great but it does not look too much like a clown it looks like a zombie I think you are going for a zombie clown type thing you could probably add like fading clown makeup that might look good.

I feel like this is something i would see at another evil carnival.. reminded me of the clown on the truck in maximum overdrive.

A clown without a red nose. It looks good but there's something wrong with his nose.

Looks good , but the face doesn't looks like a clown though.

Looks more like some psychotic zombie to me.
