Thread: [Bot's joining](#)

black4night - April 13, 2018, 4:32 pm

I've been tired, people work really hard in a server, but some day the kids start booting the server, using proxy to spam the server with + than 100 or + than 200bots, with that the server drop down, is there anyway preventing that spam bot conection? any plugin, script? anything

It's just the same thing, some hour a kid start setting up bots in the server, and they flood the server and lag it so hard.

Thank's to everyone, sorry for bad english!

Metalclaus - April 15, 2018, 4:11 am

There's plenty of plugins that prevents bot from joining your server, just... google? I can't give you the plugin that I used on my server, because I forgot it's name and the last time I actually ran a Minecraft server, was 1-2 years ago?, I don't really know.

LINK: [google/search?q=Anti-Bot+plugin+minecraft](https://www.google.com/search?q=Anti-Bot+plugin+minecraft) (I don't have 50 posts to give you the full link, just add the .com after google)

I've tested antiproxy, antibot, antijoinbot, stopproxy, everything, none work that good.

I used to dominate servers and ruin economies with /f power

black4night - April 18, 2018, 7:08 am

Hello Vitani, haven't tried, i'll try it.

But what if im using a lobby? i currently have bungee cord + lobby, and in lobby how can i prevent the pots?

Streax - *June 14, 2018, 2:44 am*

Disable the offline mode and the bots would need their account paid to join. Doubt anyone would invest that much.
