Thread: [lafeltrinelli Giftcard Cracker | Proxyless | \\$25 | Get unlimited lafeltrinelli](#)

SIM-2223238 - April 14, 2018, 8:48 am

BUY IT NOW HERE: <https://digitox.net/p/1kfhz>

There's some issues with windows atm as its not supporting one of my dependencies (which is installed by default on unix)

Selling this baby that I just made, it has the ability to go upto 1m requests a hour and is 100% proxyless, never been ratelimited before.

site: <https://www.lafeltrinelli.it/>

Here are some features:

1. Proxyless. Can send upto a million requests a hour!
2. Sourcecode, by buying you'll recieve the sourcecode for FREE so you can analyze it and try making your own cracker!
3. 100% unlimited support, feel free to message me anytime!
4. runs 24/7 and is multi-platform as it is a PHP code!
5. Not too hard to setup on Unix enviroments, basically run n go.
6. Auto saves all valid codes
7. No need to import a code list it'll generate them for you
8. No false positives it only gives you the correct codes

Proof: <https://i.gyazo.com/c42102d9b33141df0a55449b2f5ad35c.mp4>

Accepting: Crypto and Paypal

Autobuy: <https://digitox.net/p/1kfhz>

By purchasing this product you acknowledge that getting codes isn't guaranteed, it's a bruteforcer, not a magic machine. It'll attempt random possible optic codes and check if they work or not.

Fixed the payment bug on Digitox, sorry for the inconvenience!

duepi - April 16, 2018, 8:51 am

I can write a full review for this cracker, if you need write me a PM

Anyway wish you good luck with sales ?
