Thread: [Account Checker Source // 8 Modules // Proxy Support & Rotation // Multi-Threaded](#)

?JJ - April 14, 2018, 2:54 pm

I've been working on a .NET Account Checker, currently with 8 modules (Instagram, Twitter, Reddit, Discord, Netflix, Wish, Evanto and Cpanel).

The checker does support proxies and has an in-built custom rotation system (e.g: when the response is 504 (time out) the checker changes to another proxy to keep the work).

It does save Invalid and Valid accounts and it also says what module you're currently checking and the progress (e.g: Account 1 of 5000 (with a progress bar)).

It has 2.0 dependencies and it's coded in VB.NET.

The code it's not documented but I can do it, just ask for it.

The price is \$135 BTC/ETH (Price increases If you opt to choose more modules, a custom design on the application or/and license system).

If you want to test it before buying, make sure you have all the accounts necessary to proceed with the test.

Preview:

THE UI IS PRETTY BASIC BUT AS I MENTIONED BEFORE, IF YOU WANT A CUSTOM TOP-NOTCH DESIGN JUST CONTACT ME.

Spoiler ([Click to View](#))

Still selling this, any questions don't hesitate to contact me.

Manks - April 16, 2018, 2:12 pm

looks like a good product, I can see a good profit from this

UnrealApp - April 16, 2018, 9:27 pm

Looks like a pretty good program, I can vouch, Cyberlin makes some quality content.

PerfectStorm - April 16, 2018, 9:29 pm

Any vouch copies available on this thing

There are no vouch copies, you join my TeamViewer with all your user:password and test it.

Only doing this with potential buyers tho.

Gatt - April 17, 2018, 2:18 pm

I would have bought it if I know how to code as this would be useless if module/config got patched and I dont know how to redo it

I will give lifetime support (as long as the buyer stays in contact with me of course) and revisions so don't worry about it.

?JJ - April 18, 2018, 3:27 pm

Still selling this.

I can see someone make an huge profit from this.

I've watched single modules going up to \$55 per license.

I might increase the price tomorrow.

?JJ - April 20, 2018, 12:48 am

The page has been moved, last time selling on SSS.

Get this while you can for \$135.
