Thread: [Best place to take classes online? \(College\)](#)

Does anyone have any recommendations for where to take classes online?

I'm finishing my second semester at a college right now but I dropped a class and need to make up the credits if I want to graduate in 4 years.

If you know any easy online 4 credit classes I can take let me know ?

You need to speak with an adviser at your school. You can't just take any random 4 credit class and expect it to count. It must be approved before it will be added to your transcript.
