Thread: [OMG Bitcoin Bull Run SOON! BUY! BUY! BUY!](#)

xShadowAlk - April 15, 2018, 6:05 pm

It feels so obvious that another bitcoin bull run is coming soon! Did you guys see that huge jump a few days earlier? This is just a clear sign that big boys are coming into the market and are ready to let bitcoin loose on another bull run! If you don't buy in now you are missing out on huge opportunities! I mean there has been tons of great news for crypto recently, such as the release of lightning networks and many big names starting to deal with crypto. Just imagine, once people become aware of how amazing lightning networks is and how easy it will make adoption with its revolutionizing technology it will boom past these previous highs like nothing. \$20,000 per bitcoin will seem like nothing once bitcoin truly starts to take off. We also won't have ANY issues this time with transaction fees or full mempools once lightning networks is implemented!

My prediction: Bitcoin \$50k end of 2018

Here is my Bitcoin TA:

<https://imgur.com/gallery/nQ7Ut>

TLDR; this post wasn't even long but if you skipped to here all you need to know is buy bitcoin and you will get rich soon.

OneEightSeven - April 15, 2018, 6:13 pm

Market cap slowly and surely coming back up but who knows may be a bear trap.

I'd buy a little at a time

Mewtwo - April 15, 2018, 6:22 pm

maybe because tax season is over??? lmao

Dust. - April 15, 2018, 6:28 pm

What changed your mind? <https://hackforums.net/showthread.php?tid=5820776>

Are you a troll or did you suddenly change your opinion about Bitcoin? 2 weeks ago you made a thread saying how shit Bitcoin is, and that Bitcoin Cash will take over, and now you're pro Bitcoin?

Omniscient - April 15, 2018, 7:03 pm

I'm not sure you've used any real common sense when it comes to your logic for why you expect a sudden bull market. You seem to just "have a feeling" which is fine but IMHO that's the furthest your prediction goes.

Bluffer - April 15, 2018, 8:26 pm

False bull run right now. It has to go to around 5k before it can come back up above 10k and beyond. Don't you read trading view? Poop knows his shit. Pun intended.

x8rUn0x - April 15, 2018, 8:39 pm

I saw some solid TA like yours, here.

Slowly Slowly they'll wake up and realise bitcoin cash is not bitcoin and their Jesus is nothing more than a con artist.

MillaShows - April 15, 2018, 9:45 pm

Interesting idea to make a deal with a little bit of a time to get it away right now

nubbycake - April 16, 2018, 3:10 am

Its a bull trap lol dont invest yet

Kristoffff - April 16, 2018, 5:27 am

You shouldnt be buying BTC now, you should instead put it into Alt-Coins,as they will rally and increase faster in value than BTC will be doing right now.

West. - April 16, 2018, 5:36 am

Mmh this pump seems a manipulation by big whales + some FOMO ... We need to go lower before a new bull run.

?lex - April 16, 2018, 6:45 am

BTC will not fall bellow \$6k. And if anything, I don't think it will go bellow \$7k too.

If so many people are waiting for the 4k and similar lowball prices you bet your ass that we wont see that. Shorts were at ATH before this spike and that alone is a simple indicator how the market behaves against general opinion.

mug3nz - April 16, 2018, 9:50 am

BTC is back on it's support line... best time to buy it was 2 weeks ago... still in time tho BUY BUY BUY

SIM-1589588 - April 16, 2018, 10:40 am

OP and OP's sarcasm.. Hard to catch I guess.

Marshmallow Man - April 16, 2018, 6:58 pm

It's really not hard to catch.. Don't see how others havent..

Underworldproblem - April 17, 2018, 9:49 am

As much as we're all hoping for another Bull Run, I don't think that the majority of institutional investors are ready to enter the crypto markets without regulation.

Also, they need an ideal way to enter and exit the market with large sums, which is something that XTRD and Cryptalgo can assist with.

And technically, BTC goes higher when adoption increases. So we're pretty much here for the long run.

Imagine this being the biggest bull trap ever, haha!

I agree with this statement.

I said this before, when everyone thinks that we're going back down to \$3k-\$5k and it becomes the norm, you can tell that we've hit bottom.

This is when whales will start buying up and normies fomo back into the market.
