Thread: [Slow Loading Times or Just Me?](#)

Mark Zuckerberg - April 15, 2018, 8:36 pm

Has anyone else noticed slower loading times on the site or is it just my sh!t ISP?

Saltpeter - April 15, 2018, 8:38 pm

Do you mean increased loading times? If so, would you happen to have an IPv6 address?

Omniscient - April 15, 2018, 8:48 pm

Are you saying site is fast or slow for you? Have you tried another browser?

Horus God - April 15, 2018, 8:49 pm

i had same problem its laggy for me too
i'm using chrome browser.

Nuworld - April 15, 2018, 8:51 pm

The site is load fast for me and with no issues.

JWH018 - April 15, 2018, 8:53 pm

The website loads fast as it's supposed to, and always did..it's your ISP.

Mark Zuckerberg - April 15, 2018, 8:54 pm

(Apr 15, 2018 08:48 PM)Omniscient Wrote: [\[CITE\]](#) Are you saying site is fast or slow for you? Have you tried another browser?Sorry for not being clear.

Was talking about slower loading times. I have tried on both my machines on different browsers. Not sure if its just me though.

Motusora - April 15, 2018, 8:55 pm

its look okay from here , maybe its just you

Chosen 1 - April 15, 2018, 8:56 pm

I've had no issue, the site is very fast for me. I am on google chrome.

FamousHater - April 15, 2018, 8:56 pm

site is up and down.

probably a hax0r behind the scenes

Omniscient - April 15, 2018, 8:57 pm

It could be Cloudflare at the edge location you connect to.

<https://www.cloudflarestatus.com/>

Currently shows all is normal but I seen 15-30 minutes go by before they updated the status when there is an edge issue.

B0Trun - April 15, 2018, 9:10 pm

I dont have any issues in loading , its fast for me

Agent Shark - April 16, 2018, 12:18 pm

I'm experiencing issues on Chrome and Safari. Issues are apparent through transitioning pages and it's almost like a delay.

Biggy - April 16, 2018, 5:17 pm

Certain times I have issues browsing HF, other times it's insanely fast. Really weird. On IPv4 I never had a single issue, but I only browse ipv4 when I travel to Canada.

AlexOthelionel - April 16, 2018, 6:59 pm

Works always fast for me. Not a single page takes longer than 5 seconds to load up. Far fetched but ISP/DNS?

Captain Steve Rogers - April 17, 2018, 3:12 am

Same here.

Taking longer then usual.

Rest all sites are loading fine.

ida - April 17, 2018, 7:18 pm

I thought that I was the only one experiencing this.

Switching between browsers did not solve anything.

KOTOR - April 18, 2018, 8:38 am

Still seems to be loading slowly for me. Not a huge deal but it's a noticeable 10-15 seconds longer than it used to be.

Edit: Las Vegas and Houston Nodes on CloudFlare are being re-routed.

Omniscient - April 18, 2018, 11:54 am

I think Cloudflare is dealing with some heavy DDOS attacks on their service. Maybe they aren't being too public about it.

ida - April 18, 2018, 1:38 pm

Could be, but I almost doubt it, as I have been experiencing a decrease in load speed since the first week of April. Also, similar to the feedback from other members, HF seems to be the only affected site for me.

Hapi - April 18, 2018, 1:49 pm

For me it seems that the images are the problem, some 404 and other take over a second to load when they are < 100kb.

Omniscient - April 18, 2018, 8:57 pm

(Apr 18, 2018 01:49 PM)Hapi Wrote: [\[CITE\]](#) For me it seems that the images are the problem, some 404 and other take over a second to load when they are < 100kb.

I did make some changes to htaccess. That could be it. I'll see what I've done over the past few weeks and see if I can improve anything.

ida - April 19, 2018, 8:25 am

(Apr 18, 2018 01:49 PM)Hapi Wrote: [\[CITE\]](#) For me it seems that the images are the problem, some 404 and other take over a second to load when they are < 100kb.

Weird. I have no issues with images, but nearly every action is delayed; viewing pages, adding reputation, checking alerts, or quoting posts.

The browser network activity shows 4-6 seconds for the initial HTML document for nearly all requests. Results are similar across different browsers.

Armada - April 19, 2018, 8:31 am

(Apr 15, 2018 08:48 PM)Omniscient Wrote: [\[CITE\]](#) Are you saying site is fast or slow for you? Have you tried another browser?

I have noticed latency the last few days myself.

Tried Chrome (main browser) and Firefox, same results on both for me.

Omniscient - April 19, 2018, 11:11 am

I would need someone in XMPP with me to do some testing. And for those with slow loading times. Is it all pages all the time?

EDIT: Worked with Lani to resolve this. It was an issue with slow NS lookup times with Google DNS. I've made adjustments and it seems that we resolve faster now.

Anyone else still having slow loading times or has this improved for you?

Captain Steve Rogers - April 19, 2018, 12:46 pm

Can confirm working fine now.

No slow loading.

Thanks!

Armada - April 19, 2018, 3:24 pm
