SIM-403479 - April 17, 2018, 12:03 pm

Appraisers Rolling Recruitment Thread

Application Process

Here's how the application process will work. You will fill out this initial application form.

Along with your application:

Choose a service/product in the [Free Services and Giveaways Section](#) and do a formal review of it.

In addition, you must also choose any thread located in the [Appraisals and Pricing Section](#) and do a formal appraisal of it.

If you need guidance on how your review or appraisal should look, check out [\[Community Alert\] Official Appraisers Review Archive](#)

We will use this thread as a new member farm, and thus recruitment will never close. We will accept or deny members on a rolling basis.

Requirements

As a group that dedicates itself to appraising products and services, funds and ownership confirmation, as well as acting as a marketplace watchdog, we are the first line of defense between a great marketplace transaction, and a bad community experience for someone.

We believe that acceptance into Appraisers requires a level of community prestige as-well as a steady and strong will. In the event of member corruption, Appraisers will hold the member personally accountable. Member of Hack Forums for at least 6 months.

Is there a reason not many want to apply for our group? Are there issues with our cause or work requirements that turn off most of the people who meet our criteria? It seems we have the fewest applications and I want to know why more people aren't interested.

Not many people are interested to review stuff to be honest or doesn't have the time to. :(Appraisers is a good group though and deserves more applicants.

Figured I would give this a shot. I have a good amount of time on my hands so I might as well apply. Let's see how this goes.

What Country and Timezone do you Reside in? United States, CST.

How much time can you devote towards group activities per week? I am on here 8+ hours a day, so quite plenty.

Have you been a part of any official groups in the past? A good amount. Currently (Writ3rs, Terminal, Skill) In the past I have been apart of Synergy, The Order, Fusion, Enigma and Echo. (I believe I am forgetting one or two)

Many reviews requires the process of reading, thinking critically as to whether we've publicly seen such products or services sold, taking into consideration as to how one wishes to construct a review and more. Hours may seem little to you, but that's a lot of time in one's individual life if you are balancing personal/professional and/or academic life altogether. Though, I do believe the group holds the reasonable standards set for the requirement to join, the workload may not seem ideal to an average user here.

Though we try to make the workload reasonable as its understanding that users may not always have the time to be online, as long as effort is being made and constant communication is made, things will work out. I say this to any potential applicants who are hesitant due to the possible high expectations of work and personal time to put into doing reviews under the group.

My Review of Wakes Spotify Alternative

The thread: <https://hackforums.net/showthread.php?tid=5828246>

After reviewing the method provided by the original poster of the thread I downloaded two app's and was ready to download and play music for free. I received clear instructions on how to add music to a download library In order to access and play these songs/videos offline. When downloading songs there are options of which quality you would like to download at which Is great for people that would just like to download audio such as songs/podcasts or 1080p for people that would like to download full films or gameplay streams. After using this app for a month or two I began collecting a huge collection of music and this became my go to app over Spotify and Apple music.

There are ad's but for a free app which allows you to download and access video/music offline this Is perfectly acceptable they close easily and do not interrupt your listening or viewing experience. Using the app to listen to music offline Is what I originally downloaded the app for as I couldn't justify paying for Spotify or Apple music as I felt I didn't listen to enough music but since installing this I find my self using It every where I can I have multiple playlist's that work perfectly for when I am In the Gym driving In the car or just out walking.

A great feature to this app Is that you can also play a video/song and close the app and continue using your phone which Is perfect for connecting your phone to something like an Alexa device starting a song and still being able to use your phone without the music/video pausing. My final words the app Is a great alternative for those who would like to try what It Is like to have Spotify premium or Apple music but with more perks I would try this out you will not regret It.

My Appraisal of a Fortnite Skull Trooper Account

The Thread: <https://hackforums.net/showthread.php?tid=5846491>

Regarding having no pictures to work with and not knowing If the account has the standalone game Save the world. With the Skull Trooper skin, Reaper pick axe, gliders and some battle passes plus other skins I would expect any where from \$325 to \$350.
