User tried phishing my IP right now.
Sales trashing my threads, false accusations.

Posted on my thread that I'm carding and have fraudulent bank accounts.

I'm assuming he is a multi-accounter aswell.
I've seen the Skype "Pastebin" throughout the forums aswell as previously new accounts having the same Skype.

I wish I could understand why people do things like this...

M?xim - April 19, 2018, 4:31 pm

What a poor attempt. There's so many better methods than that.

Yeah not an IP Grabber, just "Remote Protocol"

Definitely bullshit.

Make an account on SkypeResolver.net and look for yourself.

If it was a remote protocol why not reply to this thread? Why not PM me? Why did he PM the people that just gave him neg?

And this is why I have this kid on my ignore list now because he threatened me as well.
