These guys are the best. You can get them for ~80\$ + shipping.

They are a trusted company, so no risk involved. (They managed to get \$200k in less than 2 hours after this project was released. Thats crazy)

So if you dont mind waiting ~3 months for a quality pair of headphones, this is the time.

You posted a link that goes to a coding tutorial.

I don't need those peasant earbuds.

Stendoh - April 18, 2018, 8:13 am

Why would we have to wait 3 months to get them?

Aren't AirPods already existing for a while now?

XPLADOT - April 18, 2018, 11:27 am

I am looking for wireless earphones like this but a budget version that probably won't last very long.
