The program works exceptionally well, and their support is great.

I've used the program to give followers to friends and members of HF, and it worked flawlessly creating the accounts and sending them to the channels I wanted it to.

I haven't tested the viewbot portion yet but if it's like any other downloadable bot, it will work as long as you have proxies and the Viewbotted team tells you where you can get proxies from to get decent viewer numbers.

The program has had consistent updates and the developers seem to be open to suggestions which is a very good sign for the program.

I highly recommend purchasing if you're in the market for a twitch bot.

I got a vouch copy for chatbotted, and I can say it works. Makes accounts pretty efficiently and the chatbot works for sure! I also really liked the Miscellaneous tab that gives you information about a twitch account and its channel. My one main criticism would be the quality of the account usernames, they're certainly spam accounts with random generated names (MUTY5Z8Z etc). I also would sometimes get random popup error messages, and the program would keep shitting out more error popup messages, but I'm sure that could be tackled by a future update. Everyone Update v2.0 released!

Code - Added View Bot support.

- Added option to delay chat messages.

- Added load 2captcha key on startup.

- Added Custom Password option.? We are cheaper than any Twitch Bot competitor out there.

Looks like a nice service overall.

You are cheaper because your product does not come with a premium proxy list unlike other services.

People have to pay 50\$ + on top of your program for proper proxies.

Sir, not only are we cheap, but our software utilizes the power of Microsoft's NET Framework instead of a toy language called Java.

I bought 3 programs on here for Twitch Account Creating and the Chat bot tool. All I have to say is this is the BEST program on the forums and also their support team is AMAZING couldn't say anything bad about this team and their work.

so you can't actually designate how many viewers you want to send?

it always has to be up to 300?

im still trying to learn where to get proxies and how to filter them

and it'd be ideal to be able to select the number of viewers because for any new streamer to go from maybe 8-10 viewers to 300 will be very suspicious is all so it'd be safer to slowly grow

Massive vouch for Viewbotted, Skyline & Ghost Rider.

The program works exceptionally well, and their support is great.

I've used the program to give followers to friends and members of HF, and it worked flawlessly creating the accounts and sending them to the channels I wanted it to.

I haven't tested the viewbot portion yet but if it's like any other downloadable bot, it will work as long as you have proxies and the Viewbotted team tells you where you can get proxies from to get decent viewer numbers.

The program has had consistent updates and the developers seem to be open to suggestions which is a very good sign for the program.

I highly recommend purchasing if you're in the market for a twitch bot.

RonzaX - May 23, 2018, 11:20 pm

For the viewbot is it required we get our own proxies?

And is it possible to target small channels and get them banned via a viewbot?

HTTP Proxies are required for viewbot.

And the channels won't get banned. Unless Twitch knows you own the channel and are viewbotting for personal benefit. But I don't think you can get other channels banned.

Do you have the option to set MAX views to send ?

<http://www.proxyrack.com>

You can get about 2,000 views with 1 rotating proxy, however it is premium.

Have a look around the [VPN, Proxies and Socks section](#) as users post free proxies there.

Also, different type of proxies support different features with our bot.

HTTPs (SSL) = Account Creator

SOCKS 4/5 = Chat Bot

HTTP = View Bot

We have a "Reduce View Speed" feature that sends about 25% of total viewers you normally get. So if you get 300 viewers, you can check this option and it will only send 60. Having a max view option isn't really possible when you're dealing with multiple threads, you can't control the views in the code, only the threads.

Not hating sir, just spitting out facts. Your bot uses pastebin as it's authorization....lol just lol..I think that's enough for me to say.

Anyway, we do not care for forums much, since most of our clients come from Google search results sir.

"pastebin as its authorization" your talking about 1.0.0? the test beta lmao, we on 2.0.1 now..

the devs always working on updating his bot so it isn't planning on going anywhere and it isn't a leech code because how else is it he always adding new features? he knows what hes doing. u can't get past 10 viewers with public proxies, hes getting 100+ viewers with public proxies that explains alot

We can in our current build. All we had to do was increase the speed of the viewbot. Even though you're on 2.0, one of my clients cracked your garbage in the span of a few hours lololol.

Even with your new theme, your program looks straight out of the 90s.

Get the best bot on the market today!
We are the only bot provider that has a "RE-OAUTH" feature and can unban/refresh accounts to work for chatting and following without any issues!
Don't buy leeches out there, our program has been coded from scratch.

#Skyline - September 3, 2018, 8:31 pm

Remember we also provide free proxies after purchase.
However if you want better results it's best to purchase premium proxies and run our Twitchbot on a dedicated server or VPS with a high performance CPU to increase the amount of threads this program can process at once.

(Sep 3, 2018 08:52 PM)Abrxpt Wrote: [\[CITE\]](#) I read in the vouches you need to purchase a captcha key. Is this true?

Only if you want to create account the captcha key is needed. As you need to solve captchas when creating account with our bot, so it is automated.

If you just want to use views you just need proxies.

You can also import your own accounts if you already have them to use, so you don't need a captcha key.

We currently have stopped providing free proxies at this current stage.

And it depends on how many proxies you have. If you have 5K working HTTP proxies you'll receive 5K views.

Hey, #Skyline!

I purchased your CrackAttack program and thoroughly enjoy the experience thus far. markettakeover4u has been of great assistance for my questions and support.

Have you considered offering a lifetime subscription for your twitch bot?

Are there any terms associated with usage of the twitch bot?

Have you considered adding a subscription feature such as [Biggy's subscription bot?](#)

I didn't see any terms for the lifetime subscription for CrackAttack. Considering you began offering lifetime subscription packages only 11 hours ago as of time of writing, you may have not gotten around to updating/creating said terms. Apologies if this seems impatient.

What is a guaranteed timeframe for supporting and ensuring the program is kept in working order?
What recourse would buyers of the lifetime subscription have if that timeframe is not met?

Thanks for the help! ?

Hey, thanks for posting.

No, we won't be providing lifetime for Twitch.

No we don't have terms, just ensure you follow Twitchs terms really. We don't really care what you do. But do have a terms of use.

<https://viewbotted.terms/.html>

Don't really care about Biggy's subscription feature... We already got a working bot to do that.

Honestly, we don't care about terms and shit. We provide working products. And you'll get support as long as we'll be running this project.
