OKBYE43's New eWhoring eBook! (featuring new method for gaining money and earning traffic!) - <https://rocketr.net/buy/515c4ac768c9>

With this ebook method you can:

Find new subs, earn money from them on a different site without having to go to kik or snap.

Acquire new traffic for your already established Kik or Snap, IG, etc, and direct them there to earn more money off them!

What you need:

A Computer

Smart phone, digital camera or webcam. (anything that will let you take a photo obviously)

\$5 for the website verification. (not paying to me, this is for the website you use)

A Brain

No crazy graphics, no clickbait titles, just results. I've been e-whoring on and off since late 2015. Anytime I needed a quick, reliable source of income I become a lazy degen and grinded e-whoring. Some things have changed since 15, and I've found what I feel is a new method that has seen me raking since I started it in the beginning of this year, Jan 2018. This method isn't a secret as some may have heard of it before, but the way to setup your account and utilize the site's features is something I have exploited to my advantage, opening up another stream of income for myself. This method can be used on the site it was made for, AND help you improve traffic to your kik, snap or other apps as well. You can use it for different ways to attract and execute your marks on subs.

Within e-whoring there are many different avenues to attack, this just happens to be a method I tinkered with, having tons of time to kill. This method is still something I'm using today and is still bringing money in for me today. The ebook is very affordable given comparable products at \$6.25USD. I'm not making any wild guarantees or saying you'll become rich overnight, this is just a method I'm sharing that can help others. I have some pics of payments I've received on PayPal from ewhoring and some from using this method as well. There are no refunds for this purchase, because I know if used correctly you can make that 6.50 back extremely quickly.

Anyway, if you guys are interested here's the link for purchase -

p.s. I'm also interested in forming a partnership/group with other serious, dedicated e-whorers. If you're in the game shoot me a PM and let's think about joining forces.

Here are the pics I mentioned earlier, some PayPal payments from subs:

bump. method is good for smaller ewhorers looking to add more ways to earn money. \$400 a week is a realistic mark with this method, even for newer users.

The last few weeks have been picking up for me, haven't been updating much. Updated the ebook to include a few more tips and tricks involving this method.

Been off the forums for a while, but this ebook is still available and a good purchase for beginner e-whorer's looking for unsaturated methods. Still pulling down over \$500 a week myself with this and I know beginners can even make at least 300-400 a week with the approach outlined in the book.
