No distribute is ESET's honeypot scan there only if you want eset detection :)

For a free service: <https://detectwith.me/> made by

<https://hackforums.net/member.php?action=profile&uid=3206518> he is not distributing.

I will also go for <https://run4me.net/> detects on drop/runtime

And if you want a hq scanner I'll go for <https://dyncheck.com/login>

I haven't heard of these scanners, I'm more familiar with the ones from Nos.

But I will sure be looking into these ones. Thank you again.

Take note that this one currently don't work.

<https://detectwith.me/>

Hmm. We're having trouble finding that site.

We can't connect to the server at detectwith.me.

If that address is correct, here are three other things you can try:

Try again later.

Check your network connection.

If you are connected but behind a firewall, check that Firefox has permission to access the Web.
