I know a really good one for like 250\$ lifetime. I've used it everyday for the past 8 months in comp. and never got banned. PM me if you're interested.

Common man.... dont hack. The game is fun as it is. I mean, whats the point of using hacks?

Hacking in blizzard games is a bad idea.. Unless you got a lot to spend it wont end well

You can find plenty of pixel bots out there for sale.

If you're looking for memory then you're going to need to shell out at least \$1k.

This is true. I know of 3 right now with buy-in at \$1,200 with monthly subscriptions at \$600 and \$500 respectfully.

There is a really good pixel/mem hybrid I know of that is \$50/wk or \$75/mo but it doesn't come close to a top notch memory bot.

Perhaps if you're looking for an undetected memory, you'd have to pay that much, but I know of some detected memory bots that don't cost anywhere near \$1k.
