Thread: [Alpha test my social media platform](#)

siur - April 22, 2018, 4:32 pm

For the past year I've been working on an idea of mine of creating a clean social media platform where people can share, learn, each, lurk and socialize.

Pretty much what every other social platform was supposed to be before all the retards, attention-whores and thots came along.

Right now everything is still in really early stages, so there's still bugs and things to be added but I'm looking for feedback and opinions from people who understand what I'm trying to do.

If you want to join or check it out and share your thoughts please post below and I will message you with the URL and all the other cool stuff.

Advantages of doing it is you might be first to take part of an awesome new concept, can create free unlimited clubs and other cool stuff that will be changed later on.

If you're interested in being a part of the project let me know. Maybe we can work something out.

Thanks.

I'll be more than happy to be an alpha tester and give some feedback. I'd like to see this social media platform as I'm not an big fan of any other social media platforms.

Would definately be cool to check it out and score a OG username.

Let me know bud. Hopefully this platoform has game changing differences, rather than just a copy of everything before it.

Messaged you both.

Right now there's not a lot of differences but the long plan is to create something unique and different from most alternatives.

Thanks.

The UI isn't bad from first glances. Gonna explore around once I get the verification email.

Are you using Usercake or a custom user management system?

I'm down, have any marketing plans for the site yet such as ads and mass influencing people to leave Facebook for your platform?

uable - April 23, 2018, 2:40 am

I'd love to test it out aswell.

Yeah because you'll rather want your sensitive data on someone else's computer than on a centralized encrypted database.

Initially thought about it, but then realized that it's really not the best idea and a lot of extra work for "decentralized" in the title.

Can't do it alone at this time, maybe in the long term it could be an option but not a priority for now.

We all understand the effort & need for decentralized no offense , Recent issue with Facebook data leak , Telegram Ban in Russia and many more . Something need to be different : "Can't do it alone at this time, maybe in the long term it could be an option but not a priority for now." I get it, just trying to air my opinion .

PM'd both of you guys.
We might finish a stable beta this month and publicly post the url.
Until then you can still register and test things out by posting below.
You're also getting OG names and 30 free tokens to use.

siur - May 3, 2018, 12:40 pm

Post below if you want to check it out.

siur - July 18, 2018, 1:23 pm

Reopening this.
Made a couple changes the past few months.
Joining the platform gives you airdrop tokens, so I guess some people would want some.
