Thread: [KALI - Etherape issue](#)

cryptadd - April 22, 2018, 10:21 pm

Everytime I try to install etherape it gives me the same message. Ive tried multiple fixes yet none were successful. "Unable to locate package etherape"

Update- Ive tried buidling from source and have ended up with No package 'pango' found on gtk+. I cant install pango it says no backend and ive installed i think every dependency for it. Looking to get the apt-get thing to work.

-Thanks

```

Make sure that you have the following libraries installed (probably via apt-get)

```
libglade2-0 libglib2.0-0 libgnomecanvas2-0 libgtk2.0-0 libpango1.0-0 libpango-1.0-0
libpangocairo-1.0-0 libpangoft2-1.0-0 libcap2 libpopt0 libxml2
```
