Thread: [FORTNITE ACCOUNT W/ 14k VBUCKS](#)

FearBeta - April 24, 2018, 12:52 am

Alright, long story short.

I accidentally bought \$100 Vbucks. Called to get a refund and they denied it, disputed on Paypal and lost the case. I can show proof of this all. These isn't an account made with any method. It was bought with my own money and I regret it badly.

I suck at this game, I'm not going to waste \$100 on a game I suck on. The account is level 34, nothing special about it. Just a few free skins from Twitch prime.

I want to sell it for \$35 and will only accept a few cryptos which I believe after a while can help me make my money back eventually. No LTC.

I've had the vbucks for a week now, I waited to see if I could get a refund and didn't spend anything. I feel like it's a lost cause and want to cut my losses short and sell.

I have proof of everything if anyone is actually interested.

What Platform is it? Is it linked to another account on epicgamss already?

Can you send me your receipt you received of the purchase via PM to see if you really bought it yourself?
