love you 2 - July 6, 2018, 11:01 pm

is the crypted output native or need .net framework?

Nivettez - July 8, 2018, 6:05 am

This user is scamming everyone here. Just bought his sh*tty product which doesn't even do anything. He's saying that all licenses are suspended until a future update which is never coming. I am awaiting a response here or through PM. If not, I will forward this to the administrators.

tirapalparo - July 9, 2018, 2:23 am

I spend the same thing buy crypter
the day 1 june and it does not work I have been waiting for it to update the crypter 1 month and a half above it connects to skype and is not able to say anything I do not know how the administrators let sell scammers

the most laugh that your website is still selling crypter and has not updated 40 days because they do not delete the post? the admin because if not continue cheating

DC Working ON Big Update , Youre License Pause Until Crypter Back,
