just bought it, the method is so strong and easy to do, i can now re-fud my crypted file after it get detected, i also learned how to crypt a rat using his method :)

crypting method 10/10
spreading method 8/10
refud method 9/10
design of the ebook 7/10
silent exploit builds 8/10

overall 8/10

if you are looking to fud a rat by yourself, just buy this ebook and vaxton will help you to do it!

(Feb 19, 2018 01:50 PM)JonathanZ Wrote: [\[CITE\]](#) Vax is one of the most kind people I've ever met on HF! No doubt he will help you, even no doubt he will teach you other ways if this one doesn't work out. I am now fully able to crypt my stub 1/37! scan + runtime FUD. It's better then most crypters out of here. And for a fraction of a price of a crypter.

We even did a TV session of 3h which included teaching, talking and some RAT victim trolling!

Huge vouch for Vax, don't hesitate do deal with him! HQ guy!

(Feb 19, 2018 01:50 PM)neverdos Wrote: [\[CITE\]](#) Vaxton is a great and friendly guy! Especially if you're new to the hacking/ratting scene and need guidance, he's the man for you. He responds to messages fast, which is pretty rare around here. As a matter of fact, I was surprised he dedicates so much of his time to mentoring. We did a couple of long Teamviewer sessions. On the first one, after 3 hrs I wanted to go to bed as it was really late, but he wanted to make sure I got the lesson well :)

He guided me through setting up a rat, chose the best one for my purposes, and showed me his crypting methods (you need to get live with him to get the whole method). He'll also teach you how to protect your network pro-style.

I got 1/37 detects crypting by his method:

I am so happy that I bought this ebook because this ebook gotta cost atleast 50\$ because its gonna save your money so much, you wont need any crypters, when you will be your own crypter (lol). Buy this ebook asap if you want to get clients easily and save a lot of money. Big thanks for vaxtons! He is friendly, He would always help you, And he gave me some cools ways to spread! So go ahead and buy this ebook if you want to be a master at spreading!

I could vouch for this 100%, all that i ask of from the OP is to explain more. Some times it would seem like i wouldn have a clue of what i was doing.

Other than that, vouch!

(Feb 19, 2018 01:50 PM)diversekitkat Wrote: [\[CITE\]](#) Great eBook, following the method step-by-step gave me a UD server (4/35), however, doing the method more manually once you understand it, you can easily achieve a FUD server. Great guy to work with also! HQ, friendly, smart and supportive.

(Feb 19, 2018 01:50 PM)????? Wrote: [\[CITE\]](#) Vouch for vaxton, really patient with tutoring me his method and with FUD scan time & UD run time

About the e-book :

It uses some Technic to make your file crypt/re-fud, which includes some time(not much) and effort also some vb coding thing is happening but you don't have to worry about it bcoz everything is explained precisely on the screenshot as every step is to be done.

Note : various possibilities and various outcomes so if you do/find it how, it's very easy and vaxton does it well.

Don't hesitate to buy this ebook and GLWS.

(Feb 19, 2018 01:50 PM)Zero2Six Wrote: [\[CITE\]](#) I can vouch for this guy, he knows what he is doing!

I have spend hundreds of dollars buying crypters and now i know it was all a big waste of money! We had 2 teamviewer sessions and i can crypt my stub by myself now. It has only 1 detection on both runtime and scantime by eset(im trying to get that 1 scantime detection away).

He is really patience and tells u exactly how it works and what u supposed to do.

Its not only 1 method or ebook. I think this wont be patched because he is teaching u exactly how to do it yourself in the future.

Big vouch for Vaxton

At first i want to say that Vaxton is a great guy, he cares for his customers, he is very responsible person and professional in his job. I lost money on HF buying crypters some sellers are terrible they will ban your license, even not to say any reason (of course not all of them). I am happy to deal with Vaxton, i think what he selling costs much more. He will give you everything you need in this job and you will not be depend on anyone.

Vouch for my man, vaxtons for teaching me how to crypt without a software, I did manage to get one of my rats fully undetected, by using a few lines of codes, it was actually super simple but I would never have realized without Vax.

He helped me out for two days now, and I got most of the basics down already, I have no coding experience but I could still do it myself, after I saw Vax do it once.

We're almost done with my package, just need to see some ways how to spread :)

I recommend hes service 100%

Just did session 1 to FUD server, Vax was timely, professional and explains all well.

Server FUD scan and runtime, I unfortunately cant post links or images yet.

Definitely gets my vouch up to this point, I will provide further feedback after my other sessions on other methods, (I purchased full package)

Huge vouch for vaxton!

Just finished session 1 with him.

Purchased Package 3.

1. He gets straight to the point.
2. Perfect English as far as I could see.
3. Gave me an extra item as he had problems with his wifi (Very Generous).
4. Friendly as could be and VERY patient as I know nothing about coding he took the time to walk me through each step.
5. Buy this as you probably wont find another person offering the same support/results in a timely fashion.

I want to buy your product.

Which exploit methods are contained in it?
Silent or Macros

Did you cover silent spreading to email?
With inbox delivery

How difficult is personal crypting? How long does crypting a file personally take?
because with crypters, you can crypt a file under 30 seconds

So clarify these questions and I would pay today

Thanks

How can ESET Security flag it as virus? Can't you fix that?

Vanilla - July 3, 2018, 2:59 pm

Kinda interested to see this in action. I would think that all you can achieve is scan time FUD with something like a encrypted zipped file (unzip on run time) causing it to be run time detected. HMU if you want to show this to me, will vouch. Thanks!
