Thread: [\[AUTOBUY\] IonMine HELA V2.5 - Silent Native XMR Miner - C++/ASM - FUD Crypts - \\$29.95](#)

xyzmonk3y - April 24, 2018, 1:45 pm

Engine Version: XMRIG v2.6.0 beta3
New hard-fork is supported.

AboutAre you tired of loosing workers? Are you tired of poorly coded silent miners? Did you ever dream of something really unique? Let's give this an end. IonMine HELA v2.5 is a complex silent miner completely written in C++/ASM from scratch, which provides highest possible efficiency and a unique mining experience. An advanced performance and runtime stability, incredibly strong botkiller, smart behaviour and a stealth execution flow is what makes IonMine unique. Of course, IonMine doesn't drop anything.

UpdaterIonMine is also able to detect an older version of itself and updates it if required. This means you can always re-execute on your client machines to stay up2date with the newest build versions.

Advanced Botkiller "IonSeek"But you might need the CPU cycles for optimal results I suppose? IonSeek, the advanced botkiller module, solves this problem without hassle. IonSeek scans the entire PC if there is anything that could behave like a malware. Additionally, IonSeek perfectly detects and kills all kind of miners running on the client machine. RunPE or other exotic runtime techniques, that doesn't matter. IonSeek will act like a usermode anti-virus engine actually.

CureGem Persistence & RecoveryBut what would you do against other botkillers? CureGem is the game-changer and your key to win this fight. The advanced CureGem persistence & recovery module ensures the existence of IonMine on the system by checking several points of its existing installation for validity and corruption and restores them if needed. Every part of IonMine can be recovered, even the binary itself (without downloading anything!).

Long nights consisting of reverse engineering, analysis, development and alot of coffee. This product will boost you up to the top of efficient crypto mining. Be your own boss from now on. Promised.

Anyways, let's get to the technical details.

Technical details

- [+] XMR Miner
- [+] Auto CPU usage (Online = 50-75%, Idle = 100%)
- [+] Auto Priority (Online = Normal, Idle = High)
- [+] Direct Systemcalls (x86/WoW64)
- [+] Startup
- [+] Safe Injection
- [+] Network-Sleep Emulation
- [+] Anti Debug/Virtualization
- [+] Proper hiding of the miner-instance when a process-viewing tool appears
- [+] Mutex

- [+] Several Anti-Sleep Techniques
- [+] IonSeek Advanced Botkiller Module [v1.3a]
- [+] Smart Update Function
- [+] Integrity Checks
- [+] Anti-Persistence
- [+] CureGem Advanced Persistence & Recovery Module [v1.0b]
- [+] High Compatibility (x86/x64) (XP, Vista, 7, 8, 8.1, 10)
- [+] Written in C++ and Assembly Language
- [+] Completely Native
- [+] Completely Thread Safe
- [+] No Dependencies
- [+] No Drops

IonSeek Botkiller details

- [+] RunPE Detection
- [+] Miner Detection (very accurate)
- [+] Parent Process Analyzer
- [+] Parent-Childtree Analyzer
- [+] Execution Path Analyzer
- [+] File Type Analyzer
- [+] Startup Scanner
- [+] Network Analyzer
- [+] Digital Certificate Analyzer
- [+] .NET Detection
- [+] Process Protection Remover
- [+] Access Control Management
- [+] Anti-Persistence Module implementation
- [+] Type: Integrated

CureGem Persistence & Recovery

- [+] Configuration verifier
- [+] Installation verifier
- [+] Startup verifier
- [+] Process verifier
- [+] Thread verifier
- [+] File verifier (very lightweight this time)
- [+] Recovers Startup
- [+] Recovers Process Runtime
- [+] Recovers Configuration
- [+] Makes full recoveries if needed
- [+] Written in C
- [+] Type: Mapped executable

How to buy

Buy one or more license key(s) [here](#)

Visit [IonMine](#)

Navigate to "Get Build" on the left side.

Be sure to have pop-ups enabled on this site.

Fill out the gaps and submit by pressing the "Get Build" button.

You will get your build in a zip archive within few seconds. Do not leave the site until you have received a download prompt.

If you submit a build with "Crypt" enabled, you will 2 files inside the ZIP-Archive. The "ion-uncrypted.bin" file can be used for future recrypts. You shall never delete it, we cannot recover anything!

ChangelogSpoiler ([Click to View](#)) [13th May, 2018] v2.5.2.2 - Hyperscan improvement
[13th May, 2018] v2.5.2.2 - Idle mode bugfix

FAQSpoiler ([Click to View](#))

Q: What is IonMine coded in?

A: IonMine and its components are coded in C/C++ and ASM.

Q: What engine do you use for mining?

A: Always the newest version of XMRIG.

Q: Can I mine on several computers with one build?

A: Yes. One build is not limited to one client machine. You can execute the miner on as many machines as you want.

Q: What is CureGem?

A: CureGem is an advanced persistence and recovery engine to detect and recover altered resources and ensure the lifetime of IonMine on the client machine.

Q: I want to use a third-party crypter. Are there any optimal settings to use?

A: Due to the deep integration of several algorithms, IonMine will most likely be incompatible with third party crypters. Please use the integrated crypter of IonMine.

Q: The integrated crypter of IonMine has detections. What should I do?

A: The stub is going to get updated 2-3 times a week to avoid signature detections as good as possible. Even tho you might face the issue of some detections. If this is the case, contact me.

Q: Does the integrated crypter offer FUD results?

A: The integrated crypter offers FUD or Semi-UD results most of the time.

Q: Do you make reFUDs?

A: The stub is going to be updated 2-3 times a week to ensure good results. However, post-recrypts are not possible.

Q: How long does it last FUD?

A: From my previous experience, usually up to 8-10 days. This really depends on many factors (such as how people treat the stub).

Q: Does IonMine work on fresh installed XP boxes?

A: Yes. IonMine doesn't have any dependencies.

Q: Is it possible to get my own instances killed by the IonSeek Botkiller?

A: IonSeek touches everything except its own parent process.

Q: What is the benefit of using IonSeek?

A: IonSeek can help you to clean and protect the client machine from malware and other CPU consuming instances (such as other miners). More CPU cycles automatically results in better mining results. Additionally, you can make sure that the client machine only hosts one miner instance and uses its CPU power to make calculations only for you.

Q: I've recently executed a build on alot of machines but I want to update the builds. Can I just re-execute a new build?

A: Yes. Due to the smart update function IonMine provides, you will be able to re-execute the new binary without any worries. IonMine automatically detects older versions of itself and updates it if required.

Q: Do you keep any logs?

A: We do not keep any logs.

Q: Is there a chance to not get banned by XYZ pool?

A: You cannot really avoid bans but you can avoid loosing your client machines by using a proxy.

If you run into any issues during the building process, contact me here or via e-mail.

Again: Enable Pop-Ups and don't close any window related to the build site until you receive your download!

Don't crypt IonMine with any third-party crypter. It'll most likely interrupt the execution flow of IonMine and break some components. Use the integrated crypter on the site.

Zero-Log Policy: Since we respect our customers privacy, we're enforcing a strict zero-log policy. This means your connection/order will remain completely unknown and anonymous. No IP, No Timestamps, No Data. Nothing will be logged.

Monero payments accepted ?

The botkiller touches everything except its own parent process. This really depends on how your RAT handles this. You can also disable the botkiller if you don't want to have it in your build.

Monero is not accepted right now.

cruxxy - April 24, 2018, 10:08 pm

Huge vouch for this miner it is the best miner i have ever used. The amount of time and effort thats

been put into this mine blows my mind and its great to have a dev that constantly updates his products. Great to see you on hf xyz, all the greatest with your business :)

Is it sustainable over time? Is there a separate charge for each update? Can it bypass antivirus software?

xyzmonk3y - April 28, 2018, 3:41 am

(Apr 28, 2018 03:16 AM)ropopo Wrote: [\[CITE\]](#) Is it sustainable over time? Is there a separate charge for each update? Can it bypass antivirus software?

You will have to pay a fixed price for each build since the builds are individually different.

The integrated crypter ensures FUD (or Semi UD) results. There will be no extra charge for a crypt or any other feature. The fixed build price includes everything.

However, if you wish to have a private stub with guaranteed FUD results, you can order one. But I do not offer private stubs for now.

ropopo - April 28, 2018, 5:52 am

(Apr 30, 2018 01:15 AM)kropotkin Wrote: [\[CITE\]](#) maybe a vouch? I got xmr silent miner from here, top selling miner but it's pure junk. is this really persistent???

Are you saying that his miners are not very good?

Tok Pengait - April 30, 2018, 5:20 am

will you guide after buying it?new with mining stuff

xyzmonk3y - May 1, 2018, 2:01 am

Updates:Improved crypter complexity

Improved miner detection algorithm (Botkiller)

Added a hyper-scan mode to target other miners seperately

Hyper-Scan mode cannot be disabled

Fixes:Fixed a bug with "stratum+tcp://" protocol

Fixed a bug where the crypter could not load PE related data atomically

Fixed a minor parsing bug in the implant installation code

Fixed a caching issue (performance related)

Fixed an implant fault where it couldn't recognize its older version when crypt was enabled

Scan of 30th Apr., 2018:

(Apr 30, 2018 01:15 AM)kropotkin Wrote: [\[CITE\]](#) maybe a vouch? I got xmr silent miner from here, top selling miner but it's pure junk. is this really persistent???

Everything is a bit harder since viruscheckmate just stopped their service. I was constantly using it and now I'm looking for a way to safely scan stubs.
You can order keys and use them anytime you want. It will always get you the newest version available.

So yes, your key can be used after the update aswell.

abuali - May 6, 2018, 3:03 am

How much time do you update. ??

lubiersito - May 6, 2018, 10:09 am

Do you offer constant FUD for only 1 payment? or do you charge the \$ 29.95 each time for the reFUD?

xyzmonk3y - May 6, 2018, 12:49 pm

(May 6, 2018 10:09 AM)lubiersito Wrote: [\[CITE\]](#) Do you offer constant FUD for only 1 payment? or do you charge the \$ 29.95 each time for the reFUD?

To be perfectly honest, the current system is not able to make post-recrypts. However, we're actively working on a post-recrypt system. So everyone will get a crypted and unencrypted build on purchase and will be able to crypt/recrypt his build anytime he wants to.

By the way: we're online again!

G0dzSoldiers - May 6, 2018, 2:30 pm

for larger worker networks I suggest minexmr.
Just put in the mining pool and the port you want to mine at.
for example:
pool.minexmr.com:5555

you can find all pool and connection details at minexmr.com

(May 7, 2018 02:53 AM)Hollow™ Wrote: [\[CITE\]](#) Got a copy of this license, everything works out really great.

I really like the bot-killer that's implanted inside, makes me feel like I have total control over a RDP that I cracked, since you're not sure whether or not other's has been on it.

I feel like it would be great once OP inputs the re-crypt feature!

Anyways, huge vouch for this product!
Glad you liked it. Enjoy your earnings.

An error happened somewhere during the build process. It's already fixed.

Anyways, I had to shutdown the site again due to a little issue with CureGem. I'm currently working on a fix.

you can use the key when the site is up again.

H3dr4 - May 8, 2018, 9:38 am

Hello there, when will the website be accessable again?

thank you

xyzmonk3y - May 8, 2018, 10:18 am

Website back online with few fixes:

Fixed a part where IonMine started leaking memory

Fixed a problem with CureGem

Made small changes inside the crypter.

xyzmonk3y - May 8, 2018, 12:12 pm

You guys can expect big updates in this weekend. Prices will increase very soon, so grab your keys!
STAY TUNED ;)

ihatemining - May 8, 2018, 11:19 pm

this shit works amazingly good. real persistence. just wondering if you know any good methods to bind the exe file to a image

FuxXER - May 9, 2018, 8:59 am

Just bought the build, it's the correct silent miner which everybody needed now. High Vouch this shits!

xyzmonk3y - May 9, 2018, 9:06 am

(May 8, 2018 11:19 PM)ihatemining Wrote: [\[CITE\]](#) this shit works amazingly good. real persistence. just wondering if you know any good methods to bind the exe file to a image

Glad you guys like it. Thanks for your trust. The IonPower is with you!

By the way, these changes can be expected soon:

Fully automated recrypt system

Recrypts can be only applied to IonMine builds. The server automatically verifies the uploaded build.

Botkiller improvements

Implant installation improvements

Modular Plugin System (thinking of it, not sure)

FuxXER - May 9, 2018, 10:04 am

Any charges for recrypt ?

xyzmonk3y - May 10, 2018, 11:20 am

(May 9, 2018 10:04 AM)FuxXER Wrote: [\[CITE\]](#) Any charges for recrypt ?

yes, but for a very cheap price.

Update:Re-Implemented bidirectional protection system: CureGem < - > IonMine

Improved performance and stability

Found a reliable scanning service. Daily scans of the stub will be made soon.

xyzmonk3y - May 11, 2018, 12:54 pm

Here we go gents and lads, fresh scan with a reFUD (11th May, 2018):

borito80 - May 11, 2018, 10:30 pm

Hi xyz, do you plan to add gpu support?

Thanks for the runtime check. Do you allow me to edit this into my main post? This would be great.

(May 13, 2018 11:28 AM)\$SUFIS Wrote: [\[CITE\]](#) Hi mate, what you mean by donation? Mean you will be getting 1% even after paying for bin? I am interested just want to make sure before i go for it. Also it will only be connecting to pool i mentioned right? Thanks

No. This miner uses the XMRIG-Engine and the developer forces a donation of at least 1 minute (in other words 1%). I personally do not charge any kind of donation.

Selfpwned - May 13, 2018, 11:50 am

(May 13, 2018 11:36 AM)xyzmonk3y Wrote: [\[CITE\]](#) Thanks for the runtime check. Do you allow me to edit this into my main post? This would be great.

Yes, sure. But I just picked the most used AVs, so not all - maybe some user want to see it for all AVs.

Would be greater, when you will add a screen with all AVs. ?

xyzmonk3y - May 13, 2018, 12:52 pm

(May 13, 2018 11:50 AM)Selfpwned Wrote: [\[CITE\]](#) Yes, sure. But I just picked the most used AVs, so not all - maybe some user want to see it for all AVs.

Glad you liked it. Thanks for your kind words.

Usually, the CPU usage should never exceed 50%. This depends on the number of threads and the CPU cache in the end.

@ALL: New recrypt system is implemented and will go online tomorrow. Currently working on a quick reFUD of the stub.

Private stubs will be available soon aswell.

Deflate - May 15, 2018, 3:45 pm

When your site will be up?

xyzmonk3y - May 15, 2018, 10:09 pm

(May 15, 2018 03:45 PM)Deflate Wrote: [\[CITE\]](#) When your site will be up?

Read my previous post. If everything goes fine, it will get online today.

You guys can take your orders until the sale is finished. The keys can be used anytime you wish.

(May 21, 2018 11:03 AM)Deflate Wrote: [\[CITE\]](#) I wanted to get it when the sale was ON, but the site was down and now i check the price is changed.

Also i see OP is offline 3 days.

(May 21, 2018 11:27 AM)divino2017 Wrote: [\[CITE\]](#) you should get the key while it's on sale, it can be used when the site is online, his away for the moment, because his fixing the crypting, his very professional coder, he puts all his time on the project, this the best quality miner than other for me. Site will be opened soon again. I'm doing my best to get this finished as fast as possible. Of course, as divino mentioned - everything will be tested extensively before deploying the new builds. New updates can be expected soon.

I was busy for the last 3 days now guys so I couldn't really work on this project. But I will turn back with a brand new crypter and some more updates!

Thanks for your patience and your trust.

borito80 - May 21, 2018, 2:20 pm

I understand that out of projects the people have a life, their work seems very good and I am looking forward to try.

You know if the feature mutex works to run the mining from multiple users?

Thanks

A250 - May 22, 2018, 3:20 am

thanks for this miner

how i can get it the site is under maintenance

Selfpwned - May 23, 2018, 10:51 am

(May 22, 2018 03:20 AM)A250 Wrote: [\[CITE\]](#) thanks for this miner

how i can get it the site is under maintenance

You can get it, when you are able to wait until he finished the next update.

xyzmonk3y - May 24, 2018, 5:33 am

so guys, to keep you up2date about the current progress - I've been working hard on the new crypter the last 2 days. New features:

Crypter:Extremely efficient polymorphic engine - creates almost completely real unique builds (unlike other competitors) proofs will be provided

Ensures safe execution environment (emulation, debugger, virtualization)

Decrypts partial code of itself on runtime

A small piece of C code, the rest is dynamically generated shellcode in assembly

Reduced number of detection vectors significantly

Output is always different and dynamic, however, the result remains the same in the end.

IonMine: Added constant signature to detect IonMine variants internally. This will be used for the installation routine.

Minor improvements and code clean-up

You can expect these updates the upcoming days.

Deflate - May 24, 2018, 6:22 am

I pmed you about this and also one question if someone pay for the build and if there is new update does we need to pay again or new update is free?

xyzmonk3y - May 24, 2018, 6:50 am

(May 24, 2018 06:22 AM)Deflate Wrote: [\[CITE\]](#) I pmed you about this and also one question if someone pay for the build and if there is new update does we need to pay again or new update is free?

updates are exclusive and have to be paid again.

SIM-3885711 - May 24, 2018, 11:06 am

I bought it a week ago, but I haven't got it yet. Can I get a new version or the old one, please?

Deflate - May 24, 2018, 3:48 pm

(May 24, 2018 06:50 AM)xyzmonk3y Wrote: [\[CITE\]](#) updates are exclusive and have to be paid again. okay how long for next update? Also what if the miner is bugged for example the update have problems and offcourse there will be free update?

borito80 - May 24, 2018, 5:01 pm

(May 24, 2018 05:33 AM)xyzmonk3y Wrote: [\[CITE\]](#) so guys, to keep you up2date about the current progress - I've been working hard on the new crypter the last 2 days. New features:

The crypter looks very good. I have a good amount of equipment with various antivirus to install and see the results in scantime and runtime.

I hope it helps to get real results.

I appreciate your work and I hope to try it soon.

Thanks for keeping us informed.

Deflate - May 26, 2018, 6:27 am

I wait for update, anyway there is no possible to buy the miner untill the website is turned on.

shmakrbrakr - May 28, 2018, 12:05 am

I think OP should disable purchase of the license since miner is being updated and not available for use..

SIM-3885711 - May 28, 2018, 2:08 am

(May 28, 2018 12:05 AM)brakrmakr Wrote: [\[CITE\]](#) I think OP should disable purchase of the license since miner is being updated and not available for use..

When his site maintenance miners can't work?

Lextian - May 28, 2018, 3:47 am

How soon will this project be back online, am very much interested in trying this miner since my present miner coder just went afk? also hope this is not a project you will abandon once you have too many customers depending on it?

H3dr4 - May 28, 2018, 9:35 am

Pretty disappointed as OPs website is still down after weeks of waiting hopefully he will fix it soon

SIM-3885711 - May 29, 2018, 3:17 am

I've waited too long ...any progress?

divino2017 - May 29, 2018, 5:52 pm

his still busy or gone? Did anyone contact him on his jabber?

Deflate - May 30, 2018, 2:48 am

The op is not active 6 days.

drillBYTE - May 31, 2018, 2:56 am

He isn't active on other sites since the 17/05.

Hope everything is still good to go @xyzmonk3y

FuxXER - May 31, 2018, 10:31 am

Never use the thing i bought even once....

sssniperwolf - May 31, 2018, 4:22 pm

Guys remember it is possible OP jas been jailed, hes not been active on hf or any other forum.

Deflate - June 1, 2018, 5:34 am

Maybe op got jailed who knows what happend, he is missing everywhere

Selfpwned - June 1, 2018, 6:02 am

wtf guys. Just dont post here and wait. What is wrong with you? Now you think he got jailed... just chill... holy.

divino2017 - June 1, 2018, 9:18 am

it's okay to wait his not active for only 5 days and 26 minutes ago.

snag[.]gy/SgYZ84[.]jpg

maybe he has personal projects too.

xyzmonk3y - June 1, 2018, 12:46 pm

So to clarify few things up:

Firstly, I'm fine. I'm not jailed.

I'm currently dealing with few things irl and have no time to sit infront of the PC at all.

But, the sale is not over. Please be patient and wait for the new version. The keys will still work.

I'm sorry, I didn't really have the chance to come online and tell you whats going on.

borito80 - June 1, 2018, 6:23 pm

(Jun 1, 2018 12:46 PM)xyzmonk3y Wrote: [\[CITE\]](#) So to clarify few things up:

(Jun 5, 2018 10:29 AM)xyzmonk3y Wrote: [\[CITE\]](#) This product will come back for sure. This is what I can ensure everyone. I will also reduce the price for some days as a sorry for the delay.

I prefer that you sell your miner for \$60+ and not for \$10-15.

Maybe you will get less customer, but the same money. And the user have longer FUD time for there miner.

I think I am not the only one, who want this?

But it is your decision. ?

borito80 - June 5, 2018, 12:20 pm

(Jun 5, 2018 10:29 AM)xyzmonk3y Wrote: [\[CITE\]](#) I can't give any ETA right now. I'm still expanding the polymorphic and shellcode engine.

Tiene razón OP, confió en usted y su trabajo.

Estoy de acuerdo con usted Selfpwned, la calidad es más importante.

xyzmonk3y - June 5, 2018, 12:24 pm

So. I guess everyone is wondering? Take this is a small taste:

The engine named "IonFuzzer" generates almost unique binaries (93% difference) - and guess

what? This is not even finished.

Once I've developed few more extras I will run a mass comparison with 100 samples.
Stay tuned.

by the way: I will respond to all PMs when I have time again. Currently busy with this.

divino2017 - June 5, 2018, 2:43 pm

very excited on this, i will deploy on my zero day on smb v5. lol

Exodus - June 5, 2018, 3:26 pm

(Jun 5, 2018 12:24 PM)xyzmonk3y Wrote: [\[CITE\]](#)

Please enable dark mode in VS before you kill your eyes ?

Selfpwned - June 5, 2018, 3:44 pm

Ok, nvm. Now I would pay \$200 for this.

(Jun 6, 2018 04:24 AM)Selfpwned Wrote: [\[CITE\]](#) Hope there will be a xmrig-rproxy support with different IDs to track the miner! :p

and how you prevent xmrig-proxy not getting abuse to ip from spam.h.a.u.s? literally vps alive few weeks then closed

Selfpwned - June 6, 2018, 7:34 am

(Jun 6, 2018 07:18 AM)dazlle Wrote: [\[CITE\]](#) and how you prevent xmrig-proxy not getting abuse to ip from spam.h.a.u.s? literally vps alive few weeks then closed

Use noip and create a dns - should work, or not?

SIM-3885711 - June 6, 2018, 7:48 am

This is my first miner and continues to wait for updates.
btw,how much money can 1000 servers bring?

Selfpwned - June 6, 2018, 7:52 am

(Jun 6, 2018 07:48 AM)testnu Wrote: [\[CITE\]](#) This is my first miner and continues to wait for updates.
btw,how much money can 1000 servers bring?

A LQ pc can get up to 50 H/s

$1000 * 50 \text{ H/s} = 50000 \text{ H/s} = 50 \text{ Kh/s}$

50 Kh/s = \$2.000 a month

SIM-3885711 - June 6, 2018, 7:57 am

he scam now?

Deflate - July 5, 2018, 1:03 pm

I don't say anywhere he scam, but i said he is inactive and the project is like stopped.

NoTail - July 6, 2018, 2:19 am

it is obvious this is scam

no one should update their product this long

rip btc

Deflate - July 6, 2018, 11:51 am

It looks like Minergate silent miner, guy took 25\$ from a lot of people in HF then he didn't update the project for long time and now he tries to sell it woah.

divino2017 - July 12, 2018, 11:46 pm

this guy is dead or what?

FoolishWare - July 13, 2018, 12:43 am

he is selling the whole project on another site

Selfpwned - July 13, 2018, 4:54 am

(Jul 13, 2018 12:43 AM)The Hammer Wrote: [\[CITE\]](#) he is selling the whole project on another site

On which site?

borito80 - July 16, 2018, 10:11 am

(Jul 13, 2018 12:43 AM)The Hammer Wrote: [\[CITE\]](#) he is selling the whole project on another site Where?

xyzmonk3y - July 19, 2018, 12:08 pm

(Jul 13, 2018 12:43 AM)The Hammer Wrote: [\[CITE\]](#) he is selling the whole project on another site This was the very first version of IonMine. Check the creation date.

But yeah, I think I'm forced to make some points clear.

Alot of shit happened in the last month, close friends know what was going on. I didn't even have the time to come online and make a single google search.

Even now I'm still trying to find some time to work on this. This project has potential and everyone knows that.

If you've ever purchased a key and didn't use it yet, it will still work and can be used when the site comes online.

I've been paying the server for 2 months without making any progress, just to avoid a suspension.

But yeah, I'm still sorry for my inactivity.

Also: The thing I am working on is at a totally different complexity level. This is what I am talking about:

I've generated 100 polymorphic samples with the alpha version of "IonFuzzer", a highly efficient polymorphic engine to generate 95% unique builds.

Currently developing a full PE re-structurizer to fix manipulated code fragments.

inb4: No, I'm not using the LLVM obfuscator. IonFuzzer is my custom engine to apply polymorphic builds at instruction level.

Deflate - July 20, 2018, 2:10 pm

And how long this will take to finish? Because almost 2 months are gone?

cheesybean33 - July 23, 2018, 10:23 am

i paid for ion-mine but the website is down and i cant redeem my license key

Parasiteman - July 25, 2018, 2:48 am

Would be nice if you could adapt your miner to mine cryptonight heavy algorithm. Keep it up.

Deflate - July 29, 2018, 11:21 am

I dont know but it takes a 6 months and still you didnt finish the miner it looks like you wont finish this year it.

Deflate - August 11, 2018, 9:24 am

Nothing from this miner :(

divino2017 - August 21, 2018, 5:38 pm

(Aug 11, 2018 09:24 AM)Deflate Wrote: [\[CITE\]](#) Nothing from this miner :(

yeah i bought license almost 2 months now and nothing. maybe we can report him or just wait for another month again?

Deflate - August 26, 2018, 10:04 am

Better some admin to lock this thread, because OP is inactive, also some people pay for license and

never get it.

6 months are gone and his miner is still not finished, he also got banned in another forum.

divino2017 - September 14, 2018, 4:16 am

still no update? atleast refund our money, so we can buy other silent miner.. :-(

Nyx - September 17, 2018, 4:59 am

Website is down still?

Ughh What is going on.

Vazum - September 19, 2018, 1:44 pm

Probably this is another dead silent miner, as i can see the posts the guy is inactive, and he is updating it 4 months.

Voltaire - October 6, 2018, 7:13 am

Don't know why so much hate here. I recently was just able to login to my minergate, and I had over 32 workers still connected out of the 150 I started with several months back. This is a great product with great potential.

divino2017 - October 11, 2018, 3:50 am

seems like your site it down

Ryan????? - *October 26, 2018, 3:38 am*

Still down? Read through first couple of pages everything looked great till I saw the service announcement..
