Thread: [How to tag and mention other users in threads - Step by step](#)

Cagey - April 24, 2018, 9:40 pm

As most of you know me as the lounge whore that I am, I have my moments to be high quality - I would like to give you this step by step guide on how to tag and mention other users in other threads/posts. Most of you are aware of the new "Alerts" feature, you will need to have enabled for this to work. Hopefully, this will get improved and it won't be as much work but be grateful I figured out how to do it!

S/O to Squalo for confirming this works!

What you will need: An account on [hackforums.net](#)

Common Sense

Friends to tag/mention

"Alerts" feature enabled

Congratulations, if you meet the requirements for this method you may now proceed to the actual method! I'm going to try to simplify it as much as I can so even a brand new user can figure it out.

First step:

Find a thread or post you would like to mention your friend in (Meme, Serious, Or for no reason at all.)

Second Step:

Click the quote button as shown in the image below

[Quote Button](#)

You should get a text like this

Code [quote][/quote]and now all you have to do is go to the first quote and add ="Username"

For example:

Code [quote="Xerotic"]

[/quote]

Third & Final Step:

Make it fancy example:

Code Aye [quote="Xerotic"]

[/quote] Xerotic you need to check out this new mentioning guide It's insane!!!!

How it'll actually look:

Aye

Xerotic you need to check out this new mentioning guide It's insane!!!!

Feel free to try it out and try mentioning someone on this thread and show them how it works and

maybe a easier way will come up to mentioning and tagging

Enzio - April 24, 2018, 9:41 pm

Cagey and I just tested this and it works. ?

Copywriter - April 24, 2018, 9:42 pm

This is dope! Thanks.

Armada - April 24, 2018, 9:44 pm

I get to annoy users in a whole new way, awesome. ?

Seriously though, this should go in a hand book or guide...

Clearly, you missed the requirement of having friends since you tagged yourself.

It worked, so it wasn't required. Thanks anyway.

Vegeta - April 24, 2018, 9:58 pm

Thanks for the tip, I was never sure if that would work but I also never bothered to try lol.

I don't really see myself needing to tag people frequently but i suppose its one of those features that is there and makes the experience better but you don't really notice it.

I just wanted to find a way to tag or mention people i feel like it's easier than PMing if they actively use their Alerts.

Imagine making a new account and then posting a sales thread where you mention all active users at that point in your thread

You'll get banned quick but at least people have seen it and some might buy if it's too good of a deal

Are there limits?

To get back on this, anyone tested any limits?

You could easily screw HF for a good day by spamming the shit out of it. Am I the only one seeing that or does just no one care

It would take a few hours and your post would be too huge so it'll be spam

I'm sure Omni has something in place to prevent any wide-scale spam from using this system, he often puts a lot of though into it.

Mr. Robot - April 26, 2018, 1:23 am

Copy pasting to try alert myself.

Aye cunt you need to check out this new mentioning guide It's insane!!!!

Trying to edit post to quote for alert - doesn't work.

Aye cunt you need to check out this new mentioning guide It's insane!!!!

Mk so what you need is to go to a section that is dead, bump your old ass thread and keep commenting on it as a new post - even though it will just add to the previous and voila - 1,0000 notifications.

Nice, should help some of the newer members out in the community.

CyberStrike - April 26, 2018, 3:43 am

Nice no more PMs to point people to look at a thread nice.

Judge Judy - April 26, 2018, 4:57 am

Ayo Armada, hope you like getting alerts, because now you'll be getting two. One for the thread, and one for the quote.

Just testing it out though, xoxo.

Too late, going to buy 3pic now for that increased post size, going to tag all mentors in all of my posts to get all the attention in the world I could ever crave.

Not really though, but I'm quite upsetti spaghetti that I can't enable 2-FA as an Ub3r, rip. :(

Why can't you?

I'm an idiot my bad, I looked at /upgrade.php and didn't see 2FA mentioned for Ub3rs. Apparently it does come with the L33t upgrade though.

Thank god for mentors and all that, I'll enable it now for good measure.
