National Crime Agency UK - April 25, 2018, 4:28 am

This is a message from the UK's National Crime Agency and the Dutch National Police.

Webstresser was a DDoS-for-hire tool linked to more than 4 million denial of service attacks. Denial of service attacks are illegal in the UK and the Netherlands. They are also illegal in many other jurisdictions.

Developers, administrators and customers of Webstresser have been arrested worldwide and servers have been seized. It is anticipated that further suspects will be identified from the evidence gathered:

www.nationalcrimeagency.gov.uk/1335-international-action-against-ddos-tool

Although the Server Stress Testing section of hackforums remains closed, many of the administrators and customers of Webstresser were or are active members of Hackforums and we believe this news will be of interest to the wider community.

The Dutch National Police and Public Prosecution Service will be hosting a Reddit Ask Me Anything about Op Power Off. If you have any questions please get involved at:

https://www.reddit.com/r/IAmA/comments/8esjr6/we_are_the_dutch_national_police_and_the_public/

Replies to this message will not be responded to. To report a crime please contact the police. If you are in the UK you can report fraud and cyber crime at www.actionfraud.police.uk

Iv read this on two forums now word for word xD

Faith Connors - April 25, 2018, 10:37 am

i bet those bloody unlicensed stresser owners and users all had unlicensed tellys and screens they used to hack without license

SysAdmin - April 25, 2018, 12:49 pm

Not sure why this is here anyway, since Stress Testing and Services for it were banned a good while ago.

Slim Jxmmi - April 25, 2018, 12:52 pm

Is it just me or is it funny how the NCA has an official HF account? LOL

flavoral - April 25, 2018, 12:54 pm

is this some sort of diss track collab between UK and Dutch NCA?

On topic tho: don't DDOS kids, you ain't gonna impress your crush with it. You're just an asshole.

I can confirm that it's actually him.

The post on his Facebook profile corresponds to the date of his post on HF.

Approximately translates to

Quote:How many likes for an OVH-GAME ts3/samp server method on Webstresser?

Which corresponds to the date of this thread of him asking how much people would pay for a OVH-GAME stresser: <https://hackforums.net/showthread.php?tid=5592327>

CyberStrike - April 25, 2018, 3:46 pm

DDOS while not a permanently damaging attack it is low hanging fruit, and honestly annoying and costs corporations money be it in bandwidth, having staff put in overtime to deal with attacks or lost

sales due to customers not being able to place orders or reach services. I think we have to look to February's cryptomining attack against UK's government sites it has to look like something is being done due to bad press. Mix that in with the decision legalizing UK government hacking activities of both domestic and foreign computers/networks/phones (which I wouldn't doubt it's been done throughout most of the EU in order to have a "full take" (which the UK currently possess) on what citizens of the EU are doing online) it's confounding how UK citizens think they can get away with too much.

Tempora :

I don't know why the EU just doesn't censor the internet.. oh wait :

SIM-2696481 - April 27, 2018, 3:02 pm

Well it's a shame that they got taken down, I can only say that I knew them(3 guys from this forum) and I hope they get out asap.

If that one skid didn't hit UK banks with their booter this whole investigation wouldn't have started.

I had bad experience with Croatian police and I can only say that they are a bunch of je***.

They think they know sh*t but in reality the HTC from NL did all of the work.

Only the domains were on Namecheap, as far as I know ampnode didn't even work before this take down, they were scammers and were exposed for that. The owners of webstresser were also secretly behind other stress testing sites such as freebooter.co that got taken down in the same process because they were hosted on the same machine from offshore hosting provider AbeloHost in NL.

You can't trust even "offshore" hosting companies now. I guess Cyber Bunker and Russia are the only "safe" places left + a nice .ru .su or .to domain.

thats just better for me if they dont! anyway what makes u think im a "small fish" ? lol.. you have no idea what i am doing (i won't go in details since its not allowed on hf)

however, i know its normal here for upgraded members to call regular ones "skids" "small fish" etc.. i wouldnt expect anything else on skidforums
