Contacted him on jabber after viewing his post and requested for USA RDP with Verizon wireless DNS, and he charged me \$15 each x 5. After i sent btc, he started sending dead rdp, Isreal, Bulgaria and not working rdps and he has refused to refund me or give me what I paid for.

Hopefully, this can get figured out I just want to see a happy seller and customer in all transactions.

Riinaa - April 26, 2018, 7:28 am

ok i explain .

Guy come too me and ask me buy USA rdp with Verizon Net
i have send him 5 server USA + 2 World as gift
after 5 min he come back and say all not work ...
so i tested them and see all working .
then he start say isnt Verizon etc...

i have checked and see some are not verizon and gave him verizon in replace

Buyer still complain and say server are not working dunno what too say about this ...

I have delivered him more than 5 USA RDP server that work . we just have dispute against Verizon or not .

I have offered him fix problem as gentelman , but this guy prefered come here and cry as baby .

if he want i can give him bonus server or just refund 3\$ on each server becoz one of the require not present
let me know

oluwo - April 26, 2018, 9:08 am

I asked seller for USA RDP, with Verizon server and he claimed to have 52 of that. and after he pasted the first few rdp, I was able to login to 4 which was 1 random USA, 1 Isreal, 1 Bulgaria and 1 china. So I messaged him to complain saying some didnt work and those that worked are not what I requested, then he paste 3 more and only 1 worked and it still wasnt what I requested. if I neded random usa rdp I can get it for \$3 max. and now his claiming to refund \$3 on each after I paid \$15 for each.

My point is, I paid for Verizon rdp, he knew he didn't have and took my money, then started pasting dead rdps and random

Riinaa - April 26, 2018, 9:46 am

As you not understand simple fact , i cannot help you .

Gived many rdp USA of your request , none of them satisfy you and you ask refund ... you funny man

my last offer still ok ;)
bye

Chaval - April 26, 2018, 9:55 am

I bought an RDP from this user yesterday and didn't have any problems...

This guy is a huge scammer. Stay away from any business

IP: 151.237.5.213
IP: 203.171.40.101

Now the problem is I specify the kind of RDP I wanted, USA with Verizon host. he claimed to have 52 of it and then started pasting dead and non USA rdp. I dont want random USA RDP, its cheap and only a crazy person will buy 1 for \$15. So now he claim he cant refund because he already paste dead RDP.

does that mean anybody can open a thread claiming to sell something and after taking money, then paste bad stuff and claim you cant refund because you already paste dead stuff to the buyer?

This guy keeps twisting the whole point, clamining he sent lot of USA rdp, I didn't sent lot of USA RDP because he does not have, he kept pasting dead rdp.

I also told him to login into the rdp he pasted and make a screenshot to prove that he sent what I paid for, but he was only able to login into 1 and made a screenshot, I told him to do the same with others but he cant.

are you his boyfriend ? you are gay ?
enjoy my rep too you

YOU ARE NOBODY TOO INTERACT HERE AND I DONT CARE WHAT YOU THINK
YOU TOOK PART OF SOMETHING AND THINK YOU HAVE SOLVED THE CASE ;))

GET A LIFE AND GO TRY SETUP YOUR RAT
WHEN WE NEED FOLLOWERS WE CALLING YOU
Holy shit you're autistic.
These.
Are.
Not.
US + Verizon
RDP's

This is why HF is a shithole. At least know what the fuck you're selling.

This guy is a Multi, his first account was Coca1na where he scammed everyone.

He is now back to do the same thing, stay away from him.

siniestr00 - April 29, 2018, 8:55 am

I have been scammed with 200

Contacted him on jabber after viewing his post and requested for USA RDP with Verizon wireless DNS, and he charged me \$15 each x 5. After i sent btc, he started sending dead rdp, Isreal, Bulgaria and not working rdps and he has refused to refund me or give me what I paid for.
