Thread: [Where to find user/pass lists for RDP cracking?](#)

Chaval - April 27, 2018, 9:03 am

Hello hf

ive been getting a lot of IP's ready to be bruteforced but i dont have a good user/pass list. where should i get some? i need spanish english and portugese ones

also is 40k IP's good enough to start bruting with? already ran on kportscanner too

Dr. Gonzo - April 27, 2018, 10:09 am

I suggest you look for RDP password lists and look for Dubrute password lists. You'll find them all a variety of forums.

Mostly what you're looking for is lists with a bunch of "default" logins.

if im trying to crack foreign ip's from places like brazil, spain, russia would you recommend using lists in those languages? so far i have only found english ones

If you're asking for COMBOS, you can easily get some public combos on cracking forums such as nulled.to, crackingitaly, nulledbb, nethingoez.

Although you won't be able to download any combos from nulled.to before making atleast 25 posts maybe it was.

Try crackingitaly

Good luck.
