Old generation being cleared out it seems. That's a pretty good deal.

Jin Goddo - April 27, 2018, 6:26 pm

It's an amazing deal. You can upgrade the RAM and harddrives. You can turn this into a 1600-2000 USD computer with a couple of hundred bucks. Only wish they would ship outside of US.

The laptop is only worth about \$850. It's one of the ones I was looking at a few months ago. If you're looking for a gaming laptop to play games with, a 1050ti/1060 would be a better option. Can't turn this into a \$1600+ computer, but \$100 off isn't bad at all.

<https://www.amazon.com/MSI-GL62M-7RDX-2027-Performance-i7-7700HQ/dp/B075WXWR3K>
1050

<https://www.amazon.com/MSI-GL62M-7REX-1896US-i7-7700HQ-Steelseries/dp/B074VLX5XV>
1050ti (no NVMe). There's a 1050 option with an i5 for \$730 too.

How s the first and the second same price ? ? ? Nice find

Creative Cloud - April 28, 2018, 1:19 pm

Good deal but be careful, I have the one below this (i5-7300HQ) and they keyboard gets intermittent after a few months, seems the ribbon cable that attaches it rubs off a sharp edge on the connector and breaks over time.

Nice find

It's the lack of an NVMe drive. If I had to choose, the 1050ti is better. You can always upgrade the drive later.

G Eazy - April 28, 2018, 8:52 pm

Damn, That's not a bad deal at all!

NLSProductions - May 2, 2018, 5:33 am

Looks really good to me. Might get one similar and stuff the spectre x360
