Does anyone want to carry a noob like me in EUW? Hardstuck in silver.

NA Riven - April 28, 2018, 3:50 pm

If you are on right now Ill play 1/2 games with ya

Best way to climb in low elo is to 1 v 2 all game

you have to kill your laner and jungler without the help of your jungler to win the game

I can play on a smurf with you sometime if you like.

Gigahightiers are in silver. Be proud of your elo.

Why not just get easy coaching?

Silver isn't a hard elo by any means necessary. You are just lacking core fundamentals to the game. Like you can't cs properly, dont know that part of the map exists, or don't know how your champion works

story of my life. always in either silver, bronze or gold

If you have money I can do Solo/Duo boosting for you. If not send me your OPGG and I'll just give you some tips for free :)

I can play with you if you want, just play lulu top and il go twitch jungle. i'll boost u to gold in no time. whats ur ign

What's the point in getting boosted. You'll get to gold/plat and won't be able to keep up and just go straight back down. Climb solo and learn.

Allsaint - May 23, 2018, 3:31 pm

I would duo with you but everytime i duo with people it makes the game a million times harder no matter how well i/we play xD

If you want to climb up yourself, start from the very beginning make a new account get from the start. You will surely gain confidence playing with newbies and after that you may find yourself playing better. That's what I did in myself I hope it will work for you :D
