Thread: [DigitalMarket.trade || Marketplace || New](#)

?????IGI??? - April 28, 2018, 11:09 am

Hello HF. I recently bought the domain and setup a forum called Digital Market. I made this forum for internet users who like to buy, sell, and/or trade goods online. At the moment it's quite Vanilla and I plan to implement some plugins to assist users in trusting other members. At the moment the forum is open. Feel free to register and post. I am also looking for any staff volunteers to assist me with moderation (PM me for more info).

Please give some feedback or suggestions, I'd greatly appreciate it.

<https://digitalmarket.trade>

I really see no point for this considering all the other market forums far larger like ogflop and # etc.

You can argue you just want to run your own or whatever but I feel anyone using market as a forums subject wants to make money. That being, all you're really doing is wasting money.

Not trying to be an ass or anything but well yeah I mean you're using the default mybb skin, even the cas on the tabs are default.. if I were to just look @ your board I wouldn't want to join just based off that.

You need something to make you at least a competitor with the others, whether that's theme, plugins, content.. anything really.

Well anyway, good luck bud.

Thank you for your input. I really only paid about 50 cents setting up this site, as I already have webhosting and I have this as an addon domain. I will be working on my site and its theme to bring it up to par though. It will take a lot of time and effort, but I may come across a better idea for the website.
