Thread: [\[SALE\] Advanced RDP Cracking | Tools Included | No DuBrute](#)

AlphaTurtle - April 29, 2018, 2:45 pm

Hello!

I've spent a lot of time researching about RDP Cracking, and because I saw that some people were interested in this topic I decided to write down my method.

It is not using DuBrute or any of those shitty crackers. You will need Linux for this.

The Bonus Method is a way of cracking a lot faster and with more success. It comes with a unique tool that you won't find anywhere else.

I would consider buying this if it's a legit non public method I would find HF, google or youtube. I paid someone \$50 a few days ago for a similar method and all he said was to use kportscanner and dubrute and that's the first thing that comes up on google/youtube..

Also is the 50% off coupon already in the price? Or would it be \$10 for the second package?

This is not something public so you won't find these methods on google/youtube.

Just go to rocketr and insert the coupon and you'll see.

With the 50% the basic is \$14.99 and the premium is \$19.99

Do these come with support until atleast RDP's are obtained? I just don't want to spend money and have the same thing that happened to me happen and get nothing in return

Linux yeah.

I strongly advice everyone to use Kali.

Yeah.

I do. It can be optimized as you please.

Just purchased the BASIC...My thoughts:

Nothing I didn't already know. Which is OK.

Only 1 semi-useful method the rest are WinXP era or need LAN access.

OP mentioned it cannot be found on google/youtube > When you search that up you get at least 2 youtube videos on page 1.

Wayyy better (free) methods out there if you know where to look.

Maybe useful to novice users to get started on terminology and know what to search for.

Real Value: \$1 or freebie.

Good luck

Bro, I think you didn't read the eBook very well.

There's nothing in my eBook even remotely close to LAN access.

Yeah you might be able to find it if you know what the method implies and you search exactly that, but the thing is people don't know, and if they search RDP cracking they won't find it.

I personally spent 2 weeks researching RDP Cracking and what I have compiled in this eBook is the best way to crack a RDP. If DUBrute works better for you then Good Luck Imao

Anyways, the eBook doesn't just give you some tools and leave you to figure it out for yourself. There are in-depth explanations on how to use every tool and I also offer support.

TryTo - May 12, 2018, 2:31 pm

The ebook itself is legit, but it takes some time.

Personally I think I cracked like 3 or 4 rdp servers (I gave up in several hours), you are just bruteforcing IP list (you scan) with opened 3389 port.

The ebook contains tutorials and stuff how to use correctly some software.

Best if you also have bulletproof linux server (so you have more chance to crack) unless you want to do that on your own home connection

That's what I remember, I bought it long time ago.

AlphaTurtle offered some support on skype however I think the ebook is not worth \$30, \$15 is OK.

No reason why it wouldn't work. It's basically bruteforcing. It depends on how lucky you are and how good are the specs of ur pc.
