Thread: [\[1/5 SOLD\] Extreme RDP Exploit | 50+ RDPs/day | Reviews | BONUS](#)

AlphaTurtle - April 30, 2018, 4:10 pm

I've recently posted a method called [Advanced RDP Cracking](#).

This is something totally different. This is not cracking, this is exploiting.

With cracking (brute-forcing) you try a lot of passwords until you get the right one. With exploiting you don't do any brute-forcing.

I'm not going to make a thread design for now cause I'm lazy. So here's this:

INFO

Product/Service

This is not a product. It's a service. I will be mentoring you on how to set everything up.

Difficulty

It's not hard. I'll teach you everything, guide you through every step you can't do yourself.

Time

After setting up (which should be less than an hour) it will be pretty much autopilot.

Efficiency

I usually get 50+ per day. It depends on your computer and internet speed.

Longevity

Most of the RDPs lasted at least more than a month.

Payment Methods

BTC/ETH/BTC/XMR etc. (I won't be accepting PayPal)

Price

\$150

After 5 sales the price will increase again!

Sold: 1/5

Some RDPs that I have gotten with this method:

Idk what sus is.

One sale already because there is someone I've told about it before posting :)

Does this require an initial investment on top of buying your mentor service for this ?

throwaway5 - April 30, 2018, 6:13 pm

what would you do with 50 RDPs a day? I never got why people want so many RDPs.

Only if you want to do it on a vps. If you can do it on your computer then you won't need to invest

Is it worth it? I don't think you will make big \$.

I'm not into this stuff but consider the time to set up a miner on each rdp and that after 1-2 months they die, what a waste of time.

I would be interested in this method but idk how to monetize ?

Are you actually exploiting a vulnerability in the RDP service to break in? If so, what versions of Windows does it affect? I really doubt this is some 0 day shit.

Trying to sort out a server to do a scan.

My only issue is viewing the screenshots from a VPS. I could install a GUI frontend but would find it easier to upload them so i can sift through them
