Thread: [Java Heap Data Structures Assignment](#)

VoidSpace - April 30, 2018, 9:06 pm

So I have been stuck on this assignment for a little bit. The professor gave us a total of 6 methods to code ourselves. 4 methods reside in the heap class while the other 2 reside in the Priority Queue class. Now I can not get the correct output. I do not know if the problem is in the heap file or priority Queue. Any direction would be appreciated!
