Thread: [Unique Loader Service | FUD | JS & More | UAC Bypass | Spreading Solution](#)

Pomona - May 1, 2018, 5:23 pm

Unique Building Service

Have been in the topic for more than 5 years, personally providing manual builds.

100% unique builds.

Output will be FUD.

JS, JSE, VBS, WSF, HTM & more supported.

Execution based on Download & Execute

Detections will only depend on you.

Best FUD Lasting Top Communication Higher Exec. Rates Most Affordable

Execution rate is guaranteed to be the best with private unique builds, as nobody else will get the same codes as you.

Every builds are precious made to reach the top of executions and your security.

More than 30 obfuscation methods.

Every of your information gets heavily encrypted.

Fully bypasses UAC.

Private encoding available.

Per Build: 35\$

Other pricing on discussion.

TOS

Be peaceful.

No sales thrashing on thread.

Thats it, enjoy!

SlowMehMo - May 2, 2018, 5:08 am

Sounds Dope, not sure if i need this yet, but definitely keeping an eye on it, seems HQ!

GLWS!

Nenny - May 2, 2018, 5:49 am

Huge vouch from me,

As the Op stated it was completely fud and worked exactly as intended. I had a few issues at the begging and Pomona almost instantly helped me out in understanding what i was doing wrong. Friendly and really open to helping out if you walk in to any issue. Overall i would highly suggest this to anyone who is looking for quality exploits!

Keep up the goodwork and can't wait to see more ?

Thanks for your feedback guys

Uiqueblhats - May 2, 2018, 10:22 am

more supported extentions?

Pomona - May 2, 2018, 10:30 am

(May 2, 2018 10:22 AM)Uiqueblhats Wrote: [\[CITE\]](#) more supported extentions?
Many, come discuss.
Constantly online to support and take orders.
Cheers.

SpamHer0 - May 2, 2018, 10:47 am

Interested. Will contact you. thanks
Edit:- Seems you are offline in xmpp. Ping me when u are back.

There is anti-spam.
Re-request it should work. ?

TheBrokenWasp - May 2, 2018, 3:55 pm

Vouch for Pomona, definitely works and helps in different situations. 100% Recommended.

aranzull1n0 - May 3, 2018, 1:40 am

You tested these 'Exploits' for RunTIME scan?

Pomona - May 3, 2018, 6:07 am

(May 3, 2018 01:40 AM)aranzull1n0 Wrote: [\[CITE\]](#) You tested these 'Exploits' for RunTIME scan?
Yes, runtime is not a problem at all as I tested myself on VMwares, also bypassing UAC on win8 and 10.
No AV have reaction at all bypassing them all.

Sirhofiio - May 3, 2018, 3:14 pm

the only issue i have with .js is that it dosent execute on all systems for even things like visiting sites or executing putty

Pomona - May 3, 2018, 4:14 pm

(May 3, 2018 03:14 PM)Sirhofiio Wrote: [\[CITE\]](#) the only issue i have with .js is that it dosent execute on all systems for even things like visiting sites or executing putty

It does work on all systems from XP to Win10.

hydrophobic - May 3, 2018, 10:47 pm

If they are private builds, why can't I scan on VT?

Just curious, I don't mind if it gets detected and won't blame you if it does by scanning on vt but it doesn't affect anyone else's builds so why is it against your TOS?

Anyways seems good, I am interested

Scanning your file on VirusTotal has nothing good, even if it doesn't touch others.

Scanning on such scanners are the worst idea you can have, if you know what you do you would never use VT.

Their goal is to shutdown so whats the point.

Cheers.

Okay, I was just curious because I thought that idiots scanning on VT would affect my bin too.

I will buy this soon

Zshuell - May 4, 2018, 1:49 pm

thanks for man good working job

Pomona - May 14, 2018, 5:56 am

Service is updated, working ?
